PRODUCT:	2 Ton Stacker Crane
SERVICES:	Design, Manufacture, Installation, Quality/Load Testing

Custom solution provided the customer with equipment designed to lift and move products with consideration to narrow aisle space.

Industry Group: Crane Manufacturers Association of American (CMAA)

2 Ton Stacker Crane for Warehouse

THE CHALLENGE

To provide the customer with equipment to lift products safely and efficiently on and off of shelves in a warehouse area where using a standard forklift would be difficult.

THE SOLUTION

American Crane designed, manufactured, tested and installed a custom stacker crane that can maneuver between the narrow aisles of this product storage area.

THE RESULT

The stacker crane increased the speed of material storage and retrieval in this warehouse space without compromising safety. Features for this stacker crane include a 360 degree rotating mast along with a fail-safe braking system to prevent dropped loads, should hoist or hoist chain fail.
