

5 Question to find out if I should consider implementing conveyors & sortation systems:

- Has my throughput increased constantly over the last 2 years?
 Yes No
- Is my company projecting steady growth over the next 5 years?
 Yes No
- Do we handle many items at a high speed that are comparable in shape, weight or size?
 Yes No
- Do we have several processes in our facility (such as receiving, picking, shipping) that are automated but not connected by product flow?
 Yes No
- Are we affected by high employee turnover, shortage of workers or process quality issues?
 Yes No

If you answered 3 or more questions with 'Yes', then visit MHI.org/CSS and check out the document 'Introduction to Conveyor & Sortation Systems' to learn how you could benefit from implementing new technology.
