

Demag Electric Chain Hoist increases productivity in a work cell

Features and Benefits

Smooth Handling

Positioning Control

Safe

Reliable

Easy to Install

Industry Group: Hoist Manufacturers
Institute (HMI)

A Demag Electric Chain Hoist combined with an Enclosed Track Jib Crane provide an excellent material handling solution.

Safety and productivity in a Control Panel Manufacturing Work Cell were greatly increased as a result of this installation. The operator uses the hoist to lift and position both the assembly components and completed panels with ease.

The creep speed of the two-speed hoist gives the operator positioning control whenever he needs it. Parts that were once lifted by hand are now more safely handled with the hoist and jib. Overloads are prevented by an electronically monitored slip clutch that is standard equipment in the hoist.
