

## “Pacman” Tilter A Classic Original

### Features and Benefits

Mechanical robustness to handle high capacity loads.  
90 degree tilt improves access to the product.  
Tilts in: 30 seconds.  
Small Footprint – does not extend past base frame while in tilt position.

**Industry Group:** MHI INDUSTRY GROUP

OPTIONAL QUOTE FROM CASE STUDY

### The Challenge

A manufacturer of valve solutions for the oil and gas industry is looking to add two more “Pacman” tilters to their assembly plant. Knowing that Autoquip has the experience and history building these types of lifts turned to us to replicate the style and functionality.

### The Autoquip Solution

Autoquip engineered the “PacMan” tilter to the required specs including a wide cut out in the platform to hold the valve in place as it tilts to the other side. This style of tilter is designed to rotate within its own footprint, taking up less floor space.

Model: PAC-40  
Capacity: 40,000 lbs.  
Platform: 72”X66”  
Travel: 90 degrees

### **Solution Benefits**

We offer lifting solutions to suit the most specialized applications. It's because of this reputation, the customer turned to us to build their new "PacMan" tilters.

- Mechanical robustness to handle high capacity loads
- 90 degree tilt improves access to the product
- Tilts in :30 seconds
- Small Footprint – does not extend past base frame while in tilt position

**In Position.**
