

“Time is money, and this system doesn’t need a break”

Features and Benefits

Automatic

24 hours per day performance

Less chance for operator mishaps

Industry Group: Monorail Manufacturers Association, Inc. (MMA)

The system is very flexible and can adapt to any production requirement.

This tire manufacturer wanted to improve productivity. We created an automatic monorail system that increased productivity and reduced costly mixing errors. The system was originally handled by individual monorail systems with an operator required for each system. By automating the system they required only one operator to run the main switch center safely and comfortably.

The manufacturer had issues with mixing errors due to the old manual process. We added control sections which are computer controlled to release of precise quantity of material at the exact time.
