

“Replaced hand washing with crane system and improved safety”

Features and Benefits

Smooth operation

One operator

Full coverage

Industry Group: Monorail Manufacturers Association, Inc. (MMA)

The system is very flexible and can adapt to any production requirement.

This manufacturer wanted to improve productivity. We created a system that allows one operator to safely run a parts washing system. The system allows the operator to cover the loading area, wash tank, and unloading area, while being clear of any splash areas.

The manufacturer had issues with errors due to the old manual process. The single operator could easily keep track of the three components of the process.
