Industry Group: ProGMA

Fred Grafe, Pallet Runner Automation President says their partner of choice was obvious, Troax, Inc. "We've used Troax on many other projects and have never been disappointed. From the design phase with its multiple revisions and available CAD modelling, to the on-site adaptability and flexibility, ease of installation, responsive customer support, competitive pricing and on-time deliveries....**the guarding portion of our projects are always stress free!**"

Ultimately, however, it really is about how the end customer feels. Mark McLonis- Senior Manager of Technical Services, feels confident they made the best partner choice. "Pallet Runner Automation has been a delight to work with and every aspect of the project has exceeded expectation." **With regard to Troax, he says ".....perfect choice.** We are totally pleased with the look, fit, finish and modularity of the Troax system. We will expect them to be a part of all of Herbalife's future endeavors.

In the ever growing world of warehousing & distribution, it's all about speed, efficiency, accuracy and cost. Business is dynamic and now, so is logistics.

When Herbalife (Los Angeles, CA) needed to infuse dynamics into their new 775,000 square foot distribution center in Raleigh, NC, they reached out to Pallet Runner Automation (Oakville, ON). The goal...receive, store, process and ship orders each and every business day. The scope of the project, provide a complete material handling solution from mobile material handling equipment, racking, shelving, product invertors and Pallet Runner's semi-automated systems. A by-product requirement to round out the complete solution was to also source machine guarding and perimeter/property protection. For that, Pallet Runner Automation relied on the global leader, Troax, Inc. (Nashville, TN).

Now as part of the AUTOMHA group, Pallet Runner Automation Company after introducing Cart Based Automation over 10 years ago, are now leading the way with AUTOMHA in fully automated systems as well.

Troax, Inc. is the world's leading supplier of safety fencing and material handling solutions. Located in 28 countries, your relationship is local and your reach, global.
