

## Custom Made Solutions

### Features and Benefits

Unique door protection

**Industry Group:** MHI INDUSTRY GROUP

*2 story Height Restrictor*

**For Heeren Brothers, one of America's longest-established wholesale fruit and vegetable distributors, hygiene control has always been integral to the company's ongoing success. Looking for ways to improve on existing procedures and products is vital, particularly when complying with strict Food and Drug Administration (FDA) regulations.**

As part of the development of a new facility at Heeren Brothers' headquarters outside Grand Rapids, Michigan, the company was looking for alternatives to traditional concrete and steel barriers. Over time, those barriers chip and rust, creating flakes or debris that are potential hygiene hazards.

**A-SAFE's** collection of protective barriers are made from an innovative, patented material called **Memaplex**, which is highly durable (no need for repainting), impact absorbent and flexible (no chips or need for costly repairs) and capable of dissipating collision forces (no damaging of the facility's floors) – the products seemed ideal.

A unique, double door storage room really tested **A-SAFE's** innovation and problem solving skills, and resulted in a world first! **A-SAFE** designed a unique Double Height Restrictor and

**A-SAFE**
