“We worked closely
with Wildeck and it
was the right
decision. These
solutions worked
out great.”

Authorized Wildeck Dealer

Wildeck's Pivot Safety Gates allowed forklifts to quickly and safely move the company's liquid merchandise to and from the mezzanine deck.

When Baker Distributing (a Vermont-based, family-owned and operated beer, wine and non-alcoholic beverage distribution company) realized that they were running out of space, they knew the solution to their problem could be found by “going up.” While the installation of four Wildeck mezzanines at their two facilities resolved their space woes, the company was still in need of first-rate products that would provide access to the mezzanine's deck.

In order to fulfill orders in a timely fashion, multiple forklifts over the course of two shifts were utilized to move product throughout the facility. By installing Wildeck's Pivot Safety Gates along the edge of the company's new mezzanine, the forklifts were able to safely and efficiently access the delicate products from the new storage location. The smooth and reliable design of the Wildeck gates would play an integral role in helping the company achieve their order fulfillment goals.

Wildeck's Pivot Safety Gates help companies achieve compliance with OSHA's exposed ledge regulations by ensuring that the elevated ledge is protected at all times. Wildeck is proud to have helped Baker Distributing achieve their safety and order fulfillment goals.
