# UPS Next Gen Autonomous Parcel Hub Master Plan

## ***Key Project Elements:***

- Next Generation Hub Master Plan
- Implementation of new Containerization Concept
- Goal of completely autonomous facility

## ***Key Technologies:***

- Parcel singulators
- Tote dumpers
- Automated robotic arms for parcel handling
- Gantry Cranes
- AS/RS

## ***Project Benefits:***

- Reduced conveyor volume required on conveyor system to obtain throughput goals
- Reduced labor per package processed
