

FULL TRUCKLOAD SERVICES

Comprehensive Full Truckload Transportation Management

Our Full Truckload services can be customized to the needs of any shipper, whether you have a single shipment that needs quoting, or an entire FTL program to manage. Our operations teams provide specialized services, optimizing freight in real time, and ensuring quality service from a strategic group of reliable carriers. eShipManager® provides visibility into shipment data across locations and vendors, providing the critical business intelligence needed to manage FTL costs.

PROCUREMENT

We offer asset-based truckload services and leverage our strategic nationwide contracted carrier network to provide brokerage rates for single shipments and lanes, as well negotiated contracts for dedicated programs.

FREIGHT OPTIMIZATION

Shipments are optimized in real-time using our optimization technology and team of specialists to ensure your freight moves in the most efficient and cost-effective mode.

TRACKING

Full Truckload clients receive our Premium Tracking services on all FTL freight at no additional charge. Clients receive technology-enabled, on-demand shipment tracking and proactive delivery management to help ensure on-time delivery.

CARRIER SCREENING & PERFORMANCE MONITORING

Our S.M.A.R.T. Certified™ carrier screening process evaluates potential carriers based on Safety standards, Management, operating Authority, Reliability, and Timeliness of delivery. We work only with those carriers who meet our strict standards and performance is monitored ongoing to ensure continued quality of service.

FINANCIAL & RECOVERY SERVICES

We provide comprehensive freight bill audit and payment services, consolidated invoicing, customized GL coding, and financial reporting.

SUPPORTING SERVICES

Services include comprehensive Inbound Freight Management, freight claims filing and support, insurance, dedicated account management, on-site coordinators, and more.

TECHNOLOGY

Our Full Truckload program is supported by industry-leading technology which allows for real-time visibility and proactive shipment management, with custom integration capabilities.
