DIGITAL INSPECTION
WITH **IMPACT MONITORING**
FOR **LIFT TRUCK FLEETS**

Digital Inspections & Impact Monitoring in Real-Time on Your Lift Truck Fleet

Lift trucks are in constant motion. They are the essential tools for your daily operation. As manufacturing, distribution centers and warehouses operate in twelve-hour shifts, seven days a week, downtime simply can't happen.

But it does.

Paper-based inspections can raise several issues that can lead to complications. Instead of missing inspections or misplacing checklists, consistent inspections will maximize the value of the lift trucks while maintaining quality standards and compliance that reduces risk.

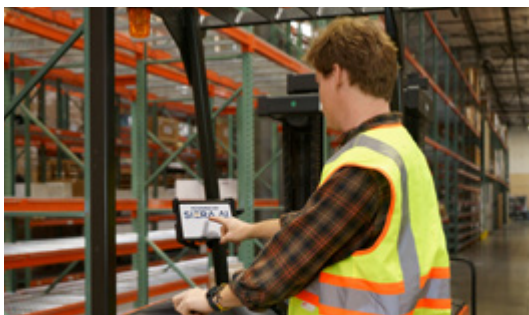

How? With Scout.

Scout is a web-based software tool for Checklist Development, Editing & Tracking. The Tool is fast, efficient and captures what you need to track, monitor & report. Even more... if a lift truck fails an inspection, identified individuals will be notified immediately.

Includes Impact Monitoring & Tracking

Impact Monitoring & Tracking takes safety one step further by reporting impacts that are greater than the specified limits set in the system. Now you can access changes, collect data and make adjustments to avoid future problems.

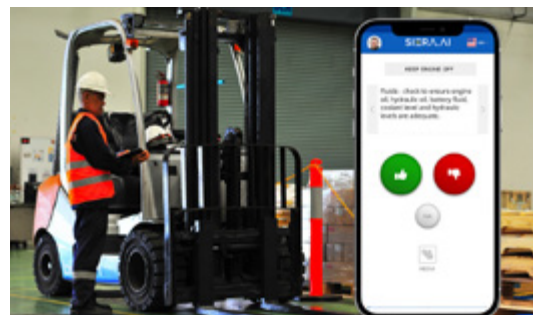

Choose How You'd Like to Use It

S2 WiFi/Cellular Touchscreen with Forklift Mount

SIERA supplies everything you need for self-installation anywhere on the lift truck

OR

On Any of Your Own Devices

Simply log-in by scanning your badge or entering in a PIN number

Dashboard Metrics & Analytics Reporting

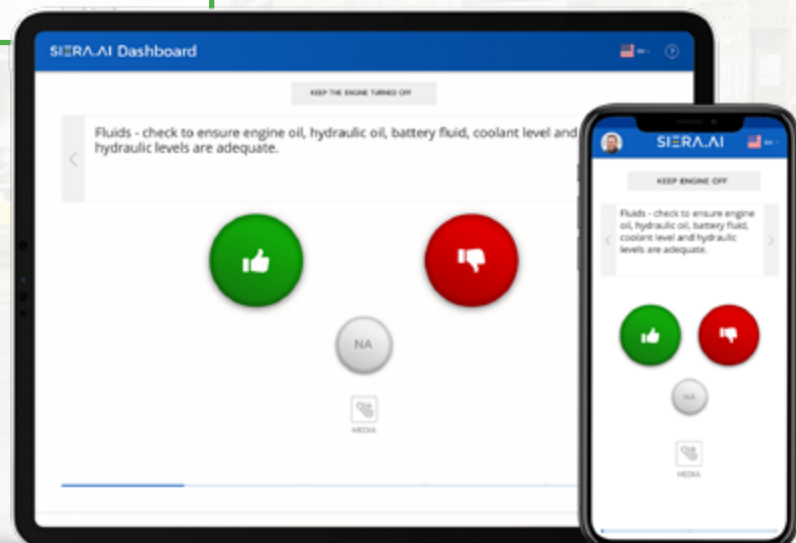

All checklist information and impact data are immediately captured and reported in the cloud. Now you can monitor real-time results while maintaining compliance, safety & asset management.

DIGITAL :: The New Way

- One-Click PDF and Excel Reports
- Instant access to facts with digital records
- Randomize Questions for increased compliance
- Instant Issue Alerts, Repair faster and close outstanding issues
- Impact monitoring and reporting
- Customized checklists for different types of trucks
- Overall & individual asset tracking and analysis

PAPER :: The Old Way

- Hard to track down
- Missed inspections
- Compliance Issues with pencil whipping
- Problems go unreported
- Hard to Track Safety Incidents
- One Size Fits All
- Lift truck lifecycle challenges

THE S2 EXPERIENCE

Operator

Knowing what the operator experiences is an important part of choosing the right compliance tool. It must be fast, easy to use and understandable regardless of language barrier.

As the driver approaches the lift truck, the driver will clearly 'see' a touchscreen mounted directly onto the lift truck. As the touchscreen is always ready to go, the driver either scans the badge or enters a PIN number.

Now that the system knows 'who' and 'which' lift truck, it will automatically display the checklist for the specific vehicle.

The operator answers the questions with a simple tap of the screen. If the driver finds an issue such as a leak, he/she can take a picture and/or add comments to further clarify the issue.

Once the driver completes the checklist. The results are immediately displayed in the SIERA Dashboard. If there is a 'failed' status, a notification is sent to as many individuals as you want.

Pre-Shift, Post-Shift & Daily Inspection

THE S2 EXPERIENCE cont'd

Fleet Manager

Effective fleet strategies require managers to be able to align lift trucks with operators and the facility. This may require the checklist to change periodically. If the information on paper is stored in binders or booklets, productivity & safety is at risk. Scout will help you achieve your fleet equipment goals.

Set-up is Easy & Fast

Decide what 'asset types' you want to capture such as forklift, reach truck, turret truck, hand pallet, orderpicker and aerials.

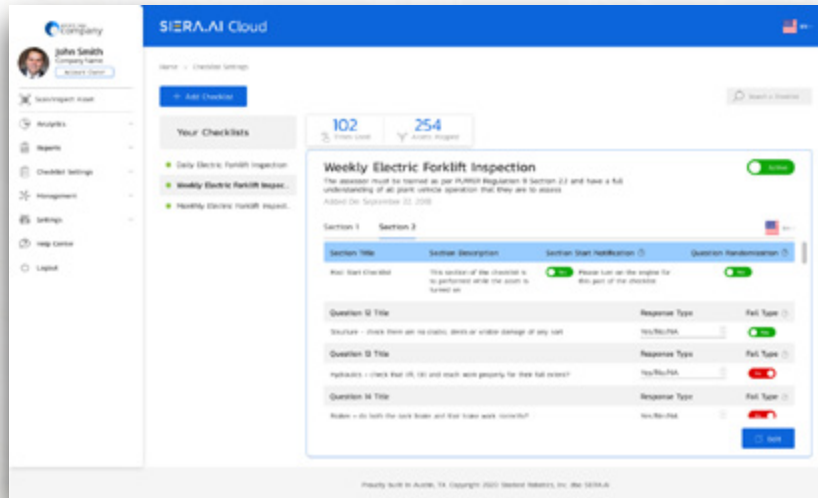

Next, define the lift truck, or create a name such as **"Sit-Down Forklift 1"**. This will automatically generate a QR code identifier. Finally, create a worksite or name the location where the lift trucks reside such as "Detroit Warehouse South".

THE S2 EXPERIENCE cont'd

Scout's flexibility allows you to generate questions for one or more checklists

Present the questions and answers in 2 ways:

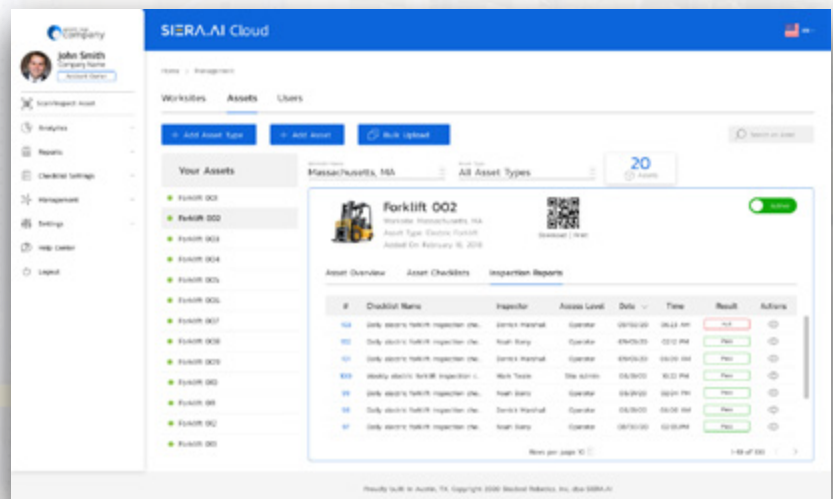

1. In a fixed, never-changing order, or

2. Randomized order for both the questions and the answers

Now you're ready to begin capturing the information to best manage the fleet for maximum productivity and OSHA compliance.

Organizations derive value from SIERA.AI's Scout when fleet managers can execute based on key metrics. For the fleet or each piece of equipment, you'll be able to:

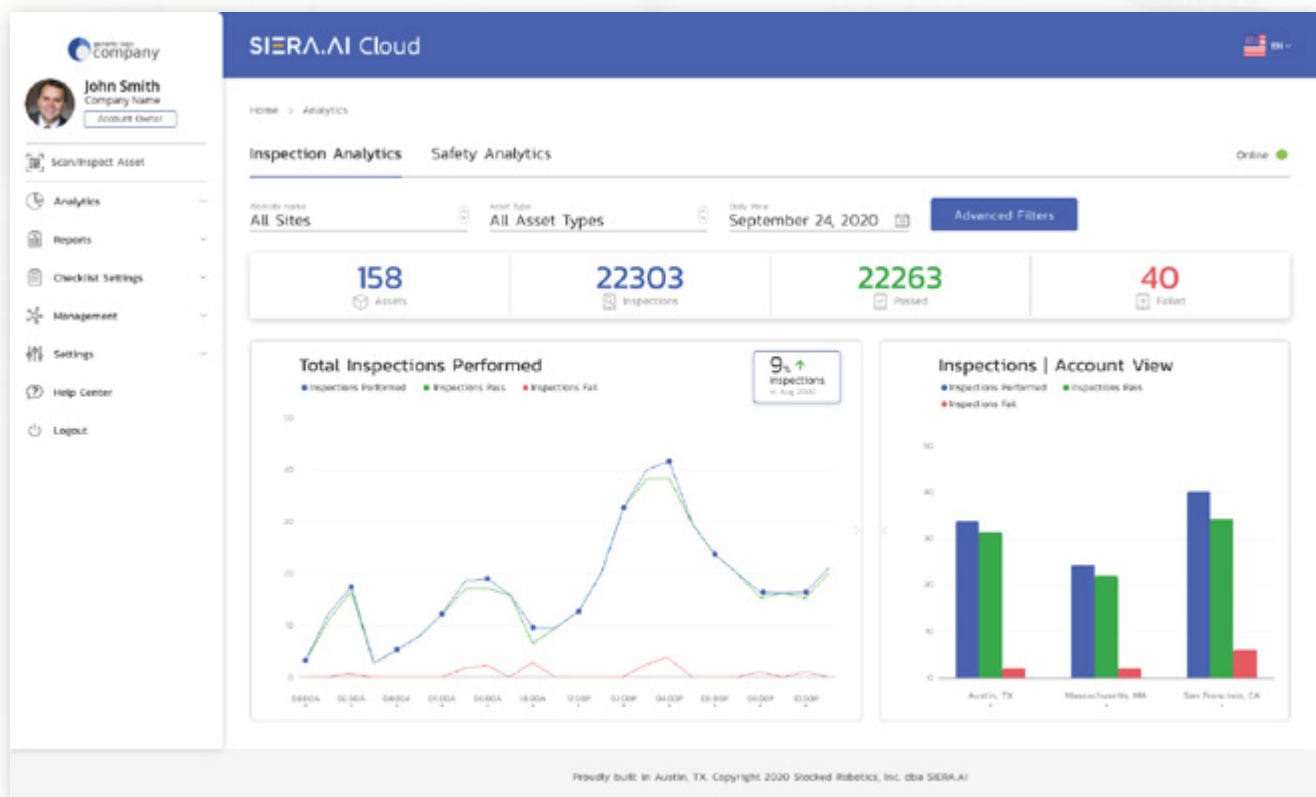

- Monitor the condition
- Detect early any failures and breakdowns
- Take corrective action immediately with real-time information
- **Receive notifications of inspection failures and send to one or more persons**

REAL-TIME DASHBOARD MONITORING & RESULTS

THE SIERA.AI DASHBOARD GIVES YOU THE POWER OF **ONE**

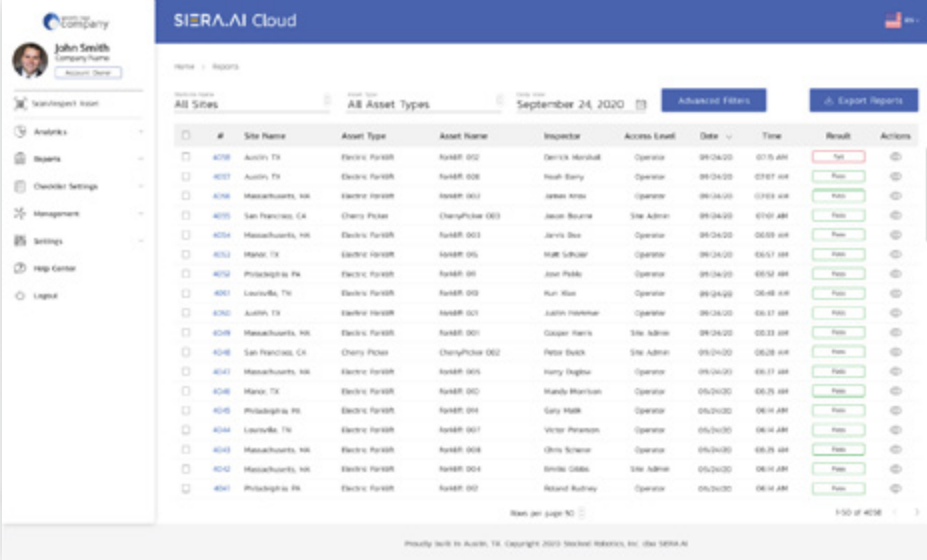

One Dashboard with real-time metrics for all of SIERA.AI's solutions in a single place. Our Dashboard empowers actionable decision making by tracking safety and performance across multiple assets in multiple locations. Track and analyze operational efforts for an hour, day, week, month, year or over any period of time.

SIERA.AI's Dashboard offers you the control to make strategic and tactical decisions for a more efficient and leaner operation. Review data quality and performance more clearly so you can identify issues in various areas of your facility in order to detect and fix the root cause.

View & Track Metrics at a Glance

Stay on top of your operational objectives and its success by managing assets and assigned workers. You'll quickly know the status of an asset or worker allowing you to take action. This will help you to identify and solve any challenges while maximizing your investment.

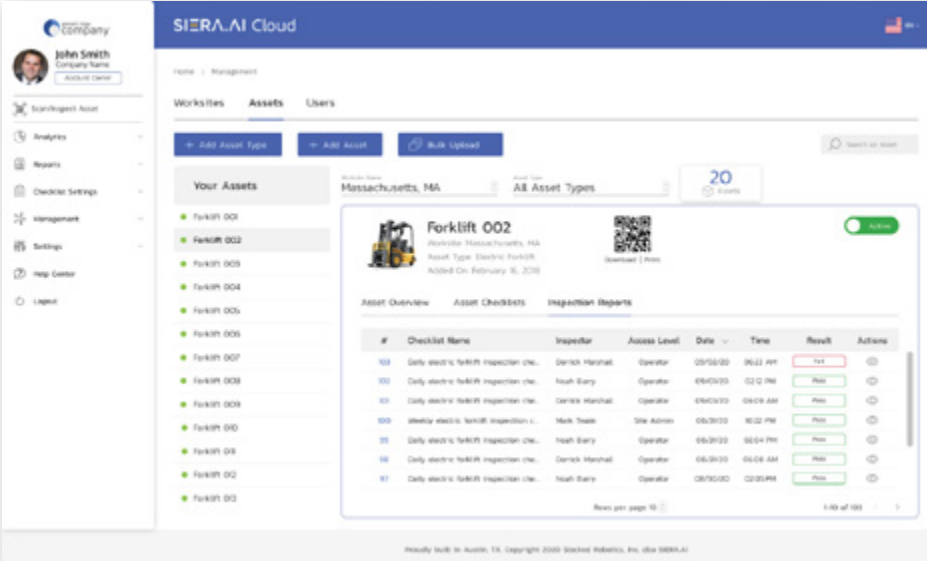

The screenshot displays the SIERA.AI Cloud interface. The top navigation bar includes the company logo, user profile (John Smith), and the title 'SIERA.AI Cloud'. A sidebar on the left contains navigation options: Home, Reports, Analytics, Assets, Checklist Settings, Management, Settings, Help Center, and Logout. The main content area shows a list of assets under the heading 'All Sites' and 'All Asset Types'. The date is set to 'September 24, 2020'. The table below lists various assets with their respective details.
