WORK

The smarter way to manage industrial batteries

Battery intelligence

Data-driven insights for optimized fleet performance

Actionable insights

Turn energy data into operational excellence

Global visibility, local control

Real-time data and notifications—no matter where you are

Quick ROI

Accelerate returns with advanced battery technology

Empower your fleet management with UgoPilot's data-driven intelligence

Unlock peak efficiency and savings with UgoWork's intuitive energy and battery management platform for industrial trucks. Designed to seamlessly integrate with fleets operating UgoWork's lithium-ion batteries, UgoPilot empowers you to gain real-time insights and make informed decisions tailored to your fleet's needs, propelling your fleet performance to its optimum potential.

Discover the power of UgoPilot

A better battery is just the start

The impact of UgoPilot on your business

Optimization
Streamline operations with personalized reports to boost efficiency.

Operational confidence
Ensure safe and efficient equipment operation through real-time fleet data.

Informed decisions
Utilize data-driven insights to make informed choices and minimize downtime through personalized notifications.

Fleet efficiency
Reduce downtime, enhance ROI, and increase throughput with customizable dashboard features for secure operation monitoring.

Transform your fleet today

UgoPilot opens the gateway to UgoWork's energy solutions that enable you to improve your bottom line. Contact our sales representative for a detailed plan breakdown.

Perfect for medium to large sized fleets, 2,000+ hours per truck, battery challenges, and a need for visibility and energy savings.
