labor efficiency

3X
more orders shipped after first
three months on Logiwa

8%
lower shipping costs with
Logiwa rate shopping

High-volume DTC requires unique capabilities

Whether you are an ecommerce retailer fulfilling orders directly to your customers or as a 3PL fulfilling orders on behalf of your retail clients, your success hinges on delivering a great fulfillment experience.

But DTC requirements are unique and difficult – and you need the right system in place to scale your fulfillment operations to meet growing demand while optimizing your costs and efficiency.

Logiwa WMS & DTC Fulfillment System: Purpose-built solution for your growing operations

Growing your high-volume ecommerce business demands capabilities that most legacy warehouse management systems (WMS) cannot provide. You need a solution that is flexible, scaleable and easy to update so you can adjust quickly as your market, supply, and online sales dynamics evolve. Logiwa's cloud DTC Fulfillment System deploys quickly, updates seamlessly and delivers value to your fulfillment operations within weeks, not months.
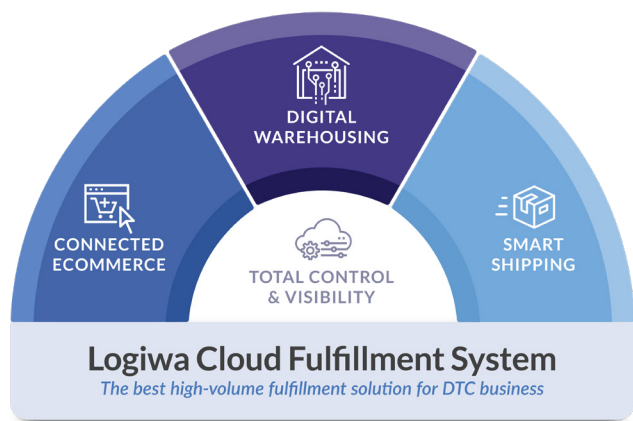

"We were up and running on Logiwa in our first warehouse in just 2-3 weeks. Our west coast warehouse really took off after we started using Logiwa."

Hooner Baweja, CEO and founder, **Shipcube**

Make high-volume order fulfillment your competitive advantage

Logiwa Cloud Fulfillment System
The best high-volume fulfillment solution for DTC business

The Logiwa DTC Fulfillment System is a fully integrated WMS and order fulfillment solution that empowers companies to run a digital fulfillment experience and grow your DTC business—without additional headcount.

Connected Ecommerce
Sell more with a fully integrated WMS that connects instantly with over 200 e-commerce, marketplaces, and order management systems.

Digital Warehousing
Run a fully digital fulfillment process with mobile apps, smart job batching, automation rules, real-time exception handling, and online reports.

Smart Shipping
Save time and money with price-optimized carrier selection and auto-printed shipping labels that get orders out the door faster.
Total Control
Easily update and extend your Logiwa WMS system in minutes not months: create warehouse layouts, update automation rules, and bring a new fulfillment center online with clicks not code.
More than just great software, we're a high-volume fulfillment success company

We aren't like the other warehouse and shipping products in the market. We respond to you in 7-9 minutes and have more automation superpowers than anyone else in the market.

Up and Running in 4 Weeks

100% SaaS product is easy to configure and easy to update. You can be up and running in weeks instead of months or years.

Awesome Automations

Use our pre-built automation rules or easily build your own to speed up everything from inbound operations to your pick, pack and shipping processes.

9 Minute Response Times

Our technology is great, but what customers love most is our amazing customer support. We actually get back to customer questions in 7–9 minutes!

"Logiwa gets universal praise from our delivery and ops teams. We constantly hear about how much better Logiwa is than our old WMS."
Jim Heinecke, Head of WMS and Systems Integration, **Deliverr**
