VECTOR SECURITY® NETWORKS

Managing Risk Across the Supply Chain Ecosystem

Facility & Product Security

From the perimeter of your property to the top of your shelves, we help keep your warehouses secure from external physical threats as we keep your product secure from damage and internal theft.

Safer Work Environment

Whether working alone, operating heavy equipment, or navigating an increasing presence of automation and moving robotics, we help keep your people and visitors safe, 24/7/365.

Data-Driven Operations

From detecting unusual activity in the parking lot to monitoring staff movement during work to intelligently managing energy use, our solutions provide reliable insights that help streamline your operations, track and report ROI, and move your business forward.

Your Single Source

Connecting physical security technologies and managed network services, we are your one source to protect products, people, and data to ensure your facilities never experience downtime.

Experience Matters in the Supply Chain Ecosystem

For more than 30 years, we have partnered with thousands of supply chain sites across the country to improve their safety, security, and operational efficiencies.
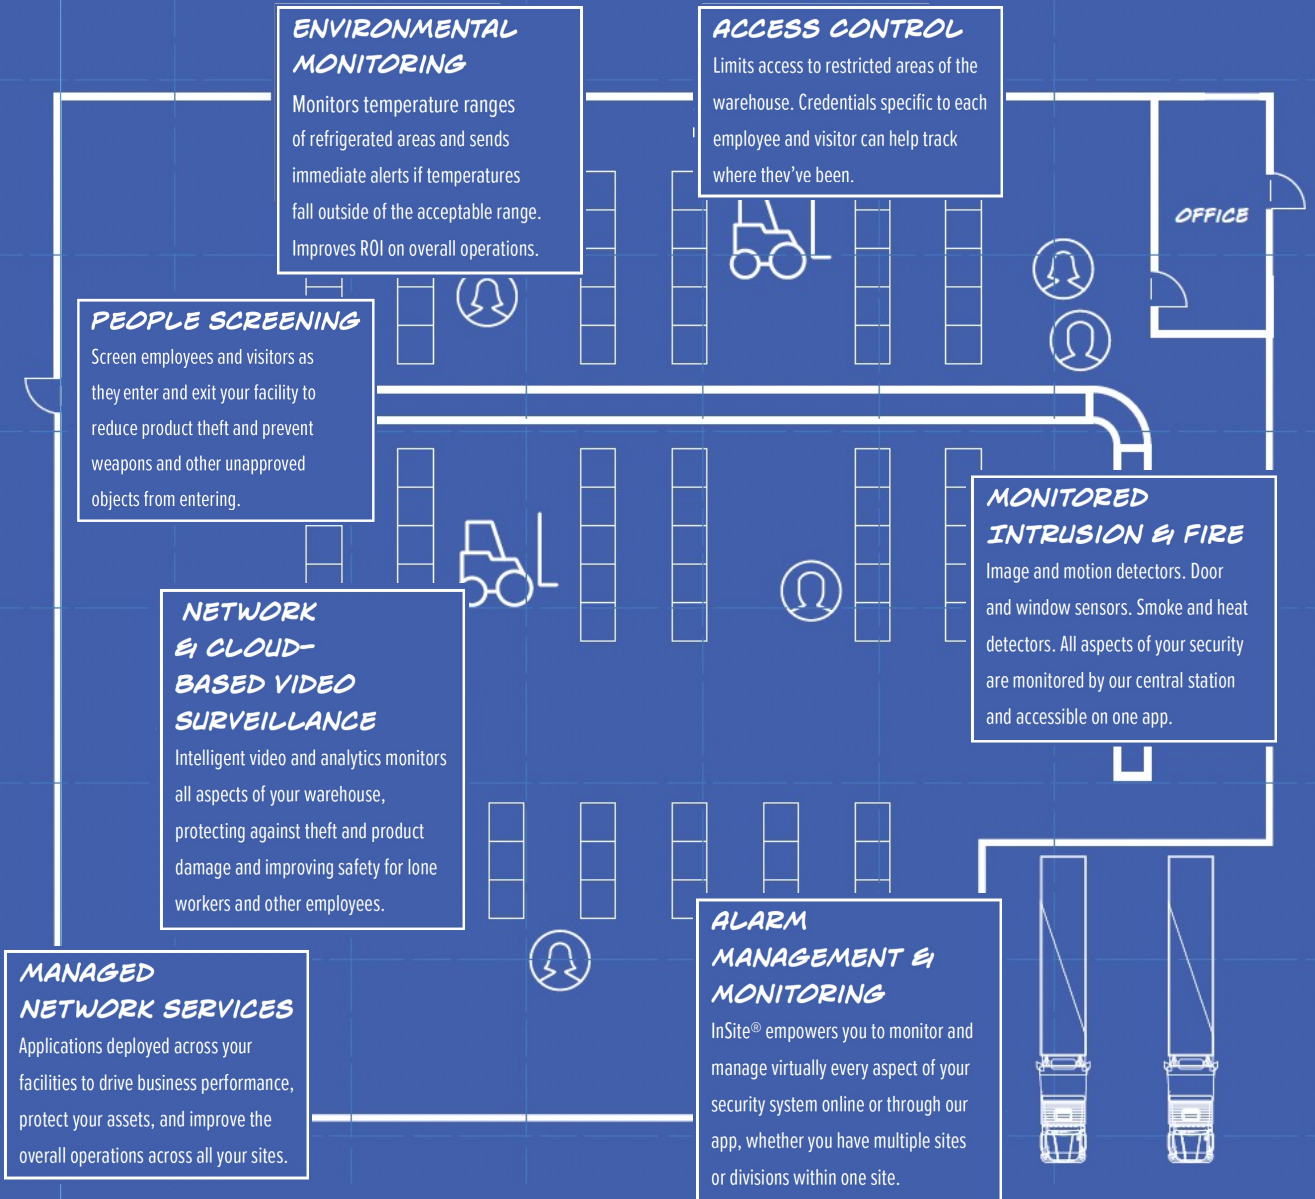

Our physical security and managed network services teams understand your role in the supply chain ecosystem and recognize the changing needs of your industry.

From the growth of e-commerce and consumer spending to the necessity of expanding storage capacity through new construction and increased automation, we've been there.

833-VECTOR-3

Your Blueprint to Securing Product and Protecting People.

VECTOR SECURITY®
NETWORKS

ENVIRONMENTAL MONITORING
Monitors temperature ranges of refrigerated areas and sends immediate alerts if temperatures fall outside of the acceptable range. Improves ROI on overall operations.

ACCESS CONTROL
Limits access to restricted areas of the warehouse. Credentials specific to each employee and visitor can help track where they've been.

OFFICE

PEOPLE SCREENING
Screen employees and visitors as they enter and exit your facility to reduce product theft and prevent weapons and other unapproved objects from entering.

MONITORED INTRUSION & FIRE
Image and motion detectors. Door and window sensors. Smoke and heat detectors. All aspects of your security are monitored by our central station and accessible on one app.

NETWORK & CLOUD-BASED VIDEO SURVEILLANCE
Intelligent video and analytics monitors all aspects of your warehouse, protecting against theft and product damage and improving safety for lone workers and other employees.

ALARM MANAGEMENT & MONITORING
InSite® empowers you to monitor and manage virtually every aspect of your security system online or through our app, whether you have multiple sites or divisions within one site.

MANAGED NETWORK SERVICES
Applications deployed across your facilities to drive business performance, protect your assets, and improve the overall operations across all your sites.

Security & Network Solutions
Access Control ● Alarm Management & Monitoring ● Video & Analytics ● Monitored Intrusion & Fire ● People Screening ● Energy Management ● Business Analytics ● Data Reporting ● Broadband ● Wi-Fi ● SD-WAN ● Cellular Back-up ● Secondary Networks ● Cybersecurity
