

Touchless Tracking™

Locate everything, anywhere, anytime

Deeyook offers a touchless indoor/outdoor asset tracking solution that provides precise location in real-time. With its breakthrough technology, Deeyook Location as a Service (LaaS) enables organizations to improve their supply chain, manufacturing and operational performance.

Deeyook Touchless Tracking:

Ubiquitous

Tracking everywhere
Indoors & Outdoors

Scalable

Fast cloud connection
due to thin pipe backhaul

Precise

(~10 cm/4")

- ❖ Deeyook **saves cost & resources** by utilizing all existing WiFi signals without association or authentication to determine location
- ❖ Deeyook **eliminates expensive deployments** with ubiquitous infrastructure of 8.5B WiFi access points from day one
- ❖ Our power efficient solution (a fraction of that of GPS) **enables long-term operation**
- ❖ Deeyook's continuously self-learning solution, adapts to the ever-changing environment, **eliminating the need for on-going RF and IT support**

Meet our Technological Breakthrough

Touchless tracking based on **interferometry** and **AI-based physical model** using the existing global Wi-Fi infrastructure.

Our Wi-Fi interferometry-based product delivers superior location accuracy than WiFi RSSI, ToF, BT AoD, and UWB.
