

# ARE CORRUGATED BOXES CREATING HIDDEN COSTS WITH EXCESS WASTE?

Traditional Box & Void Fill

Jiffylite® Strong

# JIFFYLITE® STRONG

The Jiffylite® Strong mailer is the one-stop-shop of packaging, with a removable self seal liner that doesn't require any extra materials. Jiffylite® Strong is the first mailer of it's kind, lined with heavy duty bubble designed to protect stronger and larger products.

## Protects and ships up to **3lbs**

Jiffylite Strong is a durable self contained shipper that packs products that weigh up to 3 lbs and product dimensions of up to 17" in length, 11" in width and 2.5" in height. This allows packaging operations to pack heavier and larger SKU's in mailers.\*

## **3X** faster than boxes.

Load, peel and seal is the simple three step process that is proven to enable packers to deliver up to six packs per minute. This allows three orders to be packed in the time it would take to pack one corrugated carton.

## Reduce billable weight by up to **33%.**

By eliminating the outer carton you are also eliminating excess DIM weight, which lowers your costs and helps your bottom line.

## **Increase consistency** and reduce waste

On average, packers use 10% more material per box than is actually required to protect the items inside, and a majority of boxes are 30% bigger than they need to be to fit the item inside.

\*Actual Mailer Inside Dimensions 12 1/2" x 19"
