

PICK-TO-LIGHT

Lightning Pick Light-Directed Order Picking

Optimize Productivity and Accuracy

Lightning Pick is the fastest operator-based picking automation available to boost the speed and order quality of your broken case and piece picking operations. This best-of-breed solution increases pick rate productivity, order accuracy and cost efficiency.

With pick-to-light, lights are mounted to flow rack, shelving, workstations or other material handling media. The lights illuminate to show operators the correct pick locations and quantities required to complete an order.

Hardware Advantages

All of our pick-to-light hardware options offer a superior light module design and operate independently, making system installation, reconfiguration, maintenance and expansion fast, easy and affordable.

Matthews' deep catalog of interoperable light modules offers advanced features and options to optimize your unique application requirements. Our hardware platform has been tested and proven across hundreds of installations worldwide.

Applications

- ▶ Broken case/piece picking for order fulfillment
- ▶ Kitting
- ▶ Assembly
- ▶ Medium to high SKU density and velocity
- ▶ Optimizes zone picking, cluster picking and other popular order picking techniques
- ▶ Error-proofing for manufacturing applications

Pick-to-Light

Software Innovation

Our pick-to-light systems are driven by the powerful Lightning Pick order fulfillment execution software. Advanced data management capabilities provide easy manipulation of your business intelligence and reporting needs. The management console provides complete control to add products and locations, quickly change staffing and work zones, expedite hot orders, access real-time productivity statistics, and monitor all system activities.

As a Microsoft-Certified Partner, Matthews leverages the best in Microsoft technologies to provide a revolutionary software framework—simplifying your light-directed application's integration, installation, support and performance.

About Matthews

Matthews Automation Solutions' best-of-breed product for light-directed technologies, Lightning Pick, is the number one installed pick-to-light system in North America. Our pick-to-light, put-to-light, pack-to-light, pick carts and other solutions optimize material handling processes — from manufacturing through order fulfillment.

Light-Directed Order Picking

Special Features

- ▶ Flexible, reliable hardware platform with deep catalog of features and options
- ▶ The industry's most advanced, proactive order fulfillment execution software
- ▶ Fastest growing pick-to-light user community in both new installations and legacy system retrofit projects
- ▶ Access to real-time statistics on picker productivity, order volumes and all system activities
- ▶ Quickest training curve and start-up time

Let's talk about your application.
