

Industrial Gearbox Repair and Service

Sumitomo's Aftermarket Team is the industrial gearbox repair division for Sumitomo Machinery Corporation of America (SMA). When your gearbox stops working, you need it to operate as quickly and as efficiently as possible. In many cases, efficient repair of an existing gearbox is the fastest and least expensive way to get your operation back online. Our team of experts has decades of experience repairing industrial gearboxes from Sumitomo and our competitors.

Sumitomo can repair gearboxes and speed reducers manufactured by any OEM.

INDUSTRIAL GEARBOX SERVICES WE OFFER

Industrial Gearbox Repairs

Field Service

Inspection Reports

Root Cause Investigation

Commissioning and Start-Up Services

Industrial Gearbox Warranty Services

With our expert staff, we can service and repair gearboxes and speed reducers. We inspect and assess the entire unit for issues such as cracks and chips in gear shafts and bearings. When we've finished, we'll notify you of all repairs needed.

We will repair your gearbox to the highest standards and will not compromise on quality, service, or value. Our technicians can do gearbox repairs onsite, reducing downtime and lowering costs or you can ship your gearbox or speed reducer to any of our United States facilities. All gearbox repairs are completed to the manufacturer's original specification, using genuine spare parts by default but reverse engineering replacement components when needed. We thoroughly inspect and test everything before we return it back to you.

Your gearbox or reducer will be repaired to the original factory like-new specifications with warranty using Sumitomo manufactured parts. Our industrial gearbox repair team is the industry's most versed gearbox problem solvers with centuries worth of experience. We provide both standard and custom services, for maximum industrial gearbox life. Trust Sumitomo with your small, medium, and gearbox repair services.
