## COMPLETE SYSTEMS INTEGRATION

## Columbia

Columbia Machine, Inc. & Columbia/Okura LLC. provide complete systems integration services to ensure your Columbia palletizer works perfectly with your upstream and downstream equipment. Selecting a single source integrator simplifies processes, reducing your cost and time involved and allows your internal staff to focus on keeping your plant up and running at peak performance.

# COMPLETE SYSTEMS INTEGRATION

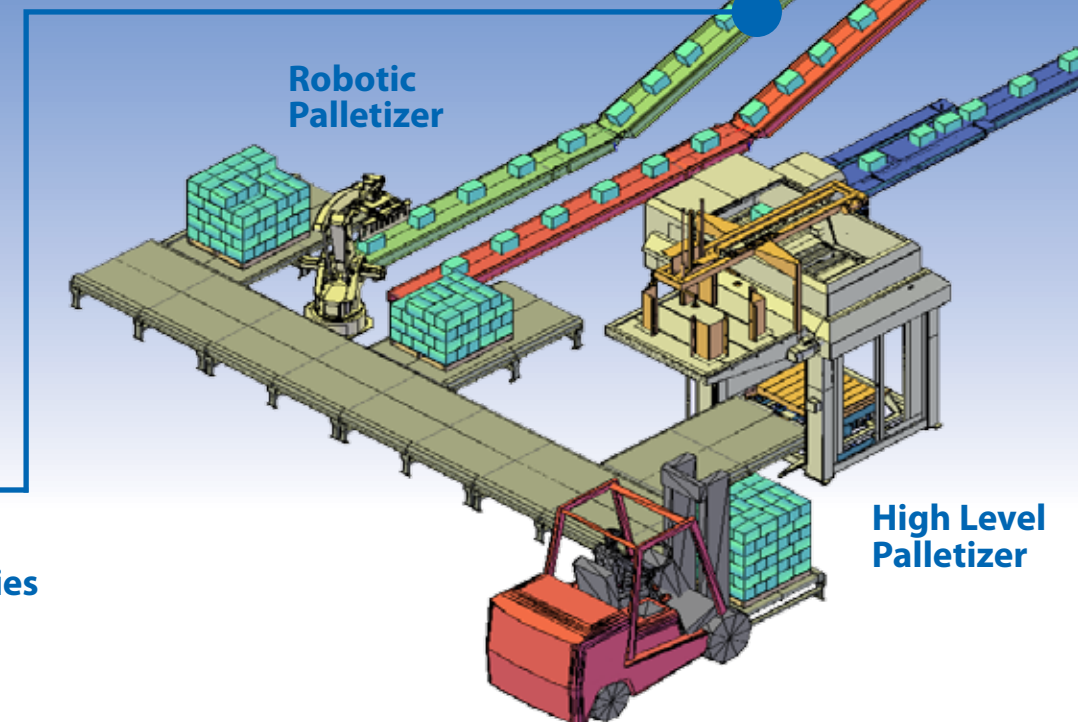

Turnkey solutions from Columbia Machine, Inc. and Columbia/Okura LLC. ensure maximum efficiency, smooth integration of all new equipment and reliable interface with your existing components.

## Complete Systems Integration Includes...

- Incorporate accumulation conveyor, barcode readers, case elevators, spiral/incline/decline conveyors, palletizers, full pallet load conveyors, shuttle cars, stretch wrappers, AGV's, RFID integration and more.
- Project management, controls, mechanical and electrical installation, wiring, commissioning, and preventative maintenance.
- Turnkey solutions from the case sealer through the warehouse.
- Any combination of the above is available for new and retrofit applications.

*Columbia Machine really handled the job well from the beginning. The Columbia team prepared a reasonable proposal which contained four FL100s, two robotic palletizers and conveyor system work, met our budget constraints and installed the equipment. I would recommend Columbia for future projects!*
