

# SMART SINGULATOR

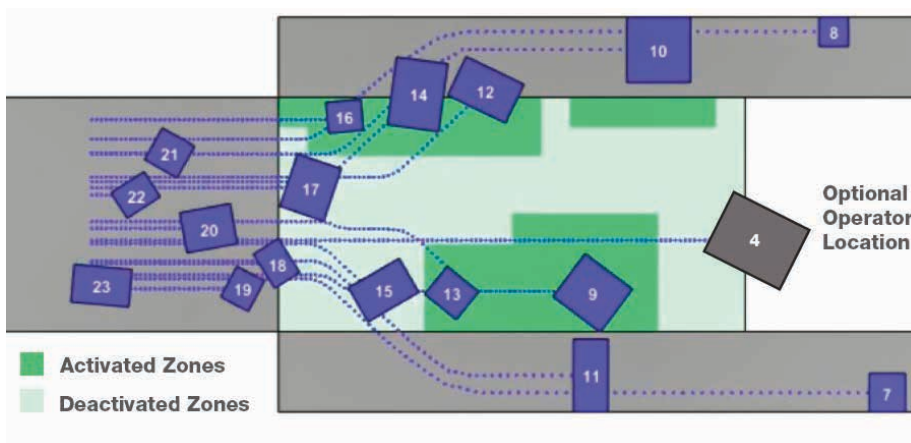

## FAST, COMPACT, AND RELIABLE SINGULATION

Separate and singulate at unsurpassed speed within a small footprint with the Intralox® Smart Singulator™. The Smart Singulator takes a bulk flow of small parcels and de-stacks, identifies, and singulates that flow into a single-file flow of items. It does this using vision, and proven Activated Roller Belt™ (ARB™) technology, at the highest rates in the industry.

Powered by Intralox Smart Control technology, the Smart Singulator reduces downtime and maintenance while improving efficiency.

### Key Benefits

- **Throughput**
  - Get the fastest, most reliable throughput at rates up to 14,000 pph
  - Improve efficiency and reduce downtime by automatically separating undesirable parcels, including oversize and stacks, during singulation
- **Labor**
  - Reduce dependency on operator skill
  - Train to operate in minutes
- **Functionality**
  - Reduce downtime and maintenance with future-ready, proven technology that can change as your ecommerce market changes
  - Over 10,000 proven ARB installations globally
- **Footprint**
  - Reduce total footprint
  - Provide downstream sorters with additional room for the maximum number of sortable destinations
