

TOTAL SERVICE CAPABILITIES

OSHA Inspections

Your equipment is subject to strict OSHA standards. We have years of experience to help you assure full compliance.

Service

We handle all types, makes, and sizes of equipment, from routine service to complete overhaul. You will find our service professionals highly responsive to your needs.

Preventative Maintenance

Service technicians inspect, lubricate, adjust, and complete minor repairs on a regularly scheduled basis to keep your equipment in top working condition. Our preventative maintenance program may actually reduce your maintenance and repair costs.

Repairs

American Crane's factory trained service technicians will identify and correct your breakdown with prompt, reliable and cost-efficient repairs.

Modifications

With facilities to handle capacity ratings up to 200 tons, we can complete desired modifications either at your site or in our modern plant. The resources of our In-house Engineering department can help you solve special applications.

Rebuilding

Our services range from parts replacement through complete rebuilding of an existing crane to meet your specifications.

Parts

ACECO maintains a comprehensive inventory of standard and custom parts, both for our equipment and that of other manufacturers. We locate the parts required without delay, and even stock our service trucks to anticipate most of your needs.

Field Service for **ALL**
Electric Cranes,
Hoists and Runways

You'll be
HOOKED
on our
Total Service
Capabilities!

The complete source for all your
crane and hoist needs.

American Crane & Equipment Corporation is dedicated to providing the finest crane and hoist service in the industry. With one phone call to American Crane, you can solve all your repair and service problems.

As a full service company, our integrated resources set us apart. Since we manufacture and sell many types of cranes and hoists (from 1/2 ton hoists to large gantry and mill cranes), we offer capabilities that include design, engineering and in-house machining. When your overhead lifting equipment requires service, you'll appreciate the difference in our technical expertise and experience.

We are Committed to Outstanding Service

At your worksite...or in our plant...we provide...

- Class A Electricians □
- Proven Fitters □
