CANTILEVER RACK

- TRIBORO CANTILEVER RACK FOR A NEAT AND ORDERLY INVENTORY SYSTEM

- INSTANT ACCESSIBILITY TO ONE PIECE OR A FULL LOAD
- FAST, CONVENIENT HANDLING OF LONG, UNWIELDY STOCK

FOR STORAGE AND EASY SELECTION OF BAR STOCK, PIPE, STRUCTURAL'S, TUBING AND OTHER LONG ITEMS OR WHERE UNINTERRUPTED DECKING IS REQUIRED.

Triboro manufactures five basic capacity series to fit your storage requirements-medium duty through extra heavy duty.

Available in upright heights 6' to 20' with 2' through 10' brace widths (measured on center). Arms are completely adjustable on 3" centers to accommodate an infinite variety of items. Straight arms are available in nine different lengths with or without lips. Heavy duty and extra heavy duty arms are both available in seven lengths with or without lips. Inclined arms are also available in seven lengths with without lips A wide range of basic sizes allow custom designing of both sides for versatility and can be used single sided or double sided depending on the size of the base used. Note the arms must never be placed on the back side of a single-based upright.

Triboro cantilever racks are modular within each basic capacity series so that additional arms, uprights and cross braces may be ordered at any time to add to your existing system. Different sized arms may be interchanged on racks to further tailor your racks to different uses. Standard and heavy duty arms components are not interchangeable with any other rack series.

Single sided uprights can be converted to doubles when used with longer bases designed to accommodate

placement of arms on both sides. Upright capacities can be computed by multiplying the number of arms per upright by the individual arm capacities-not to exceed total upright capacities listed. Arm capacity is based on even distribution of load. All racks are designed for quick assembly and come with complete instructions and hardware for installation.

Completely adjustable Triboro cantilever racks eliminate storage problems. Heavy duty steel construction permits storage of tubes, bars, structural's and other long heavy items that must be kept off the floor. Bases can be used for extra storage. Forklift easily loads off and on arms and bases. Fast, convenient handling of heavy, long unwieldy stock. Instant accessibility to one piece or a full load. For longer materials, simply add braces and uprights to fit your requirements.

Specialty designed Triboro cantilever rack systems may be required to meet your needs. Triboro representatives will work with you to develop the most feasible and economical rack system for your special situation. Special label requirements can be met at a slight additional cost. Ask us to quote prices and specifications for rack systems not covered on the Triboro buyer's guide.

STANDARD COLOR FOR ALL CANTILEVER RACK COMPONENTS IS GRAY. CUSTOM COLORS AVAILABLE AT SLIGHT ADDITIONAL COST.
