

Function-integrated profiles: Accessories and system compatibility

The new function-integrated profiles (FIP) from Rexroth offer a large usable interior and create more space for your design ideas. The completely internal cable guide allows for the safe and space-saving laying of cables, data lines, and hoses – and thanks to the new profile joints, they can even be laid through profile connectors for the first time.

This system can also be fully compatible with the standard profiles and accessories of the MGE modular system from Rexroth.

1. Cable hole

- Cables are protected from sharp edges

4. Dividing strip protective hose

- Separation into different chambers (EMC-Compliant)

7. Door handle

- Sturdy handles for opening of doors and flaps

2. Cover

- Simple installation of socket strips

5. Profile joint

- Completely internal cable routing also over profile joints

8. Door lock

- Opening to the right and left
- Standard and identical locking possible

3. Edge protector

- Cables are protected from Sharp edges

6. Proper grounding

- Potential equalization

9. Hinge

- Different versions
- Matched to profile grid
