# TAWI High Frequency Lifter High-Speed Lifting

# Time-efficient and ergonomic material handling

Good ergonomics is an effective way of making your business more productive and profitable. The TAWI High Frequency Lifter makes lifting comfortable, safe, and very time-efficient.

#### Swedish quality. Global solutions.

Cregonomic C User friendly Reduce load on body by 80%

**TAWI** has been facilitating ergonomic material handling for decades, and by customizing our solutions to your specific needs, we can guarantee that they will help lift your business.

**TAWI vacuum lifters** are robust and reliable tools that make lifting easy, for everyone. No matter your size or strength or what you need to lift, TAWI vacuum lifters will make lifting easy and efficient.

"The lifter is a real benefit for everyone. The solution reduces the strain on the body, is easy to use and works with any bag"

Sam Streak Baggage handler/team leader, ASIG at Heathrow Airport, England

# Speed up lifting of just about anything

Achieve high-speed box handling with our most rapid lifter. Grip and lift with just one hand.

Large and heavy goods can easily be handled by one single person. Boosting efficiency and lowering costs.

Lift a great variety of goods of different shapes, size and weight.

Handling large and heavy boxes can easily be done by one single person with TAWI vacuum lifters.

## TAWI High Frequency Lifter - Speed up your manual handling of goods.

**The challenge** - although many operations today can be automated, some manual handling of goods is still necessary in many industries. Speeding up manual handling while also improving employee health and safety is a challenge for many businesses.

**The solution -** with a TAWI High Frequency Lifter you can speed up your manual handling of goods while also increasing employee health and safety. With this high-speed lifter, operators will be capable of handling loads more efficiently as they will be able to keep an even pace throughout the entire day.

### "It's nice to be relieved from the heavy lifting, and you feel such a difference at the end of the day"

Henrik Westerdahl Store man, Systembolaget, Sweden

# Quick, safe and flexible lifting

High-speed lifting has never been easier. Grip and lift boxes, baggage and other goods quickly and safely with just one hand.

O Ergonomic **The TAWI High Frequency Lifter** is an ergonomic and flexible lifting solution to speed up manual handling for loads up to 145 lbs/65 kg.

User friendly

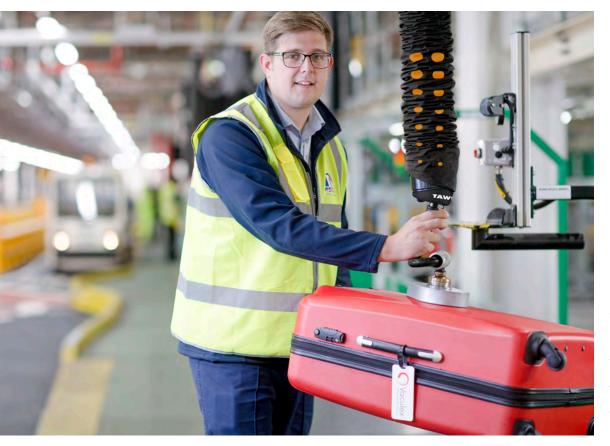

Reduce load on body by 80% The user friendly design and functionality increases productivity and reduces the risk of injury.

**The lifter is** versatile and can handle a great variety of goods of different sizes, shape and weight.

Lifting boxes and handling baggage are the most common application areas for the High Frequency Lifter, but other industries, such as the food industry, use the lifter for handling various loads such as blocks of cheese or meat, milk cartons or wine boxes.

### Key features

- High-frequency lifting
- One-handed grip with user-friendly joystick handle
- Customized suction feet to suit your goods
- Grip from the top or from the side
- Rotate loads 360 degrees
- Lift up to 145 lbs/65 kg without physical effort

Heavy baggage handling is easy and effortless with our High Frequency Vacuum Lifter.

The baggage can be rotated 360 degrees before it is placed and the angle adapter allows the operator to angle the suction foot at 90 degrees to pick up bags from the side.

We recommend mounting your TAWI High Frequency Lifter in our own range of crane systems. The jib arm or bridge crane suspends the lift tube and is available in different lengths and capacities.

One-handed grip with user-friendly joystick handle.

Smart lifting

# Main Benefits:

1	<b>Ergonomic</b> - minimize the strain on the operators.
2	<b>Economic</b> - reduce injuries, sick leave and staff turnover.
3	<b>Efficient</b> - increase productivity and reduce costs.
4	End user satisfaction - lighter work and user-friendly.
