

# THE SKY'S THE LIMIT

## MANUFACTURING

With over 85 years of crane expertise, you're getting time-tested products made by master craftsmen and backed by a robust team of engineers. Ace has the resources to deliver the best possible crane, hoist and parts for the job at the best possible rate.

## SERVICE

Ace lead technicians have advanced industry expertise with many years of experience. Whether you need an OSHA inspection, an installation, modification of an existing crane or breakdown repairs, a knowledgeable, friendly tech is available to help you 24/7.

## HOISTS & PARTS

As a master distributor, Ace passes down the savings to you on a vast selection of top name brand factory supported hoists and parts. Our helpful customer service team of experts is available for your call and will ship out to you same day if before 3pm EST (M-F).

## ENGINEERING

Ace's in-house team of structural, mechanical and electrical engineers design a wide range of made-to-order crane systems and below-the-hook devices for your unique applications. We provide dependable, turnkey solutions for all your lifting needs.

## WE STAND OUT FOR QUALITY AND COMPLETE SERVICE

Ace Industries, founded in 1932, is the largest independent overhead crane and hoist distribution, manufacturing and service company in the U.S. With crane building facilities in Houston, TX and Atlanta, GA, strategically located distributions centers, and more than 30 service locations coast to coast, we're positioned to serve any community or industry nationwide. Ace delivers excellence to our business partners in manufacturing, energy, aerospace, petrochem, automotive, primary metals, pulp & paper, transportation, government. No matter what your industry, you can count on our team to get the work done safely, efficiently, and on schedule.

## SERVICE

"Ace has done just about everything you can think of for Martin's Sprockets in the twelve years they've been our crane service—inspections, service breakdowns, engineering, modifications and parts. When I call for service, I speak to someone who's actually knowledgeable about cranes, not a receptionist. They're easy to work with, their service is fast and dependable, and their prices are good. Ace totally takes care of you."

## INSTALLING & LOAD TESTING YOUR NEXT CRANE

When purchasing crane and hoist equipment, be sure to consider installation as part of the complete project. Correct installation by a trained professional is essential for your employees' safety and efficiency.

Ace provides top qualified technicians and the necessary equipment to get your crane up and running smoothly within your timeline and production requirements.

From single and double girder bridge cranes, jib cranes, hoists, runways and more, our experienced service personnel come prepared, on-time and with the goal of making your installation as hassle-free and seamless to your workflow as possible.

Once installed successfully, load testing may be required to guarantee the stability and safety of your crane. Let Ace put our experience to work load testing your new investment so you may rest assured it will perform safely for your employees.

## UPGRADING OR MODERNIZING YOUR LEGACY SYSTEM

Modernized overhead cranes revitalize the equipment to provide you with less downtime, increased efficiency all while raising productivity and safety compliance.

Let our specialty team of modernization experts improve the performance of your working crane.

25 Ton intake gate winch replacement for an energy client's dam

A modernization can:

- ✓ Increase performance
- ✓ Increase work safety
- ✓ More reliable operations
- ✓ Reduce liability
- ✓ Improve working speed
- ✓ Enable bigger lifting heights
- ✓ Increase material handling capacity
- ✓ Add safety/automation features
- ✓ Prolong life of equipment
- ✓ Reduce maintenance cost
- ✓ Add sway control features
- ✓ Advance positioning/semi-automation

## SCHEDULE YOUR INSPECTIONS & PM AHEAD OF TIME

Ace provides inspections and preventative maintenance in accordance with all appropriate governing bodies, safety codes, manufacturer's guidelines, and industry best practices.

Depending on the type of crane you own, how frequent it used and what kind of load it carries, your inspection requirements will vary. At a minimum, an annual periodic crane inspection will be necessary for the life of your crane. Our advanced inspection technology will provide a detailed record of your OSHA inspection with fast, accurate reporting. Call Ace service and reserve your inspection time months or even years in advance or reach out to one of our knowledgeable service consultants to help establish the right inspection/PM program for your needs.

### WHERE DO BREAKDOWNS HAPPEN THE MOST?

### INSPECTIONS AND PM GUIDELINES

TYPE OF INSPECTION	FREQUENCY	OSHA REQUIRED DOCUMENTATION
Initial Inspection	Prior to use of New or Altered Cranes	Record of Inspection
Pre-Shift Functional Test	Beginning of Each Shift	Record of Function Test Recommended
Frequent Inspection	Required Monthly or at defined intervals	Record of Inspection
Periodic Inspection	Annually to Quarterly (based on duty cycle)	Record of Inspection
Not in Regular Use	Idle for 1 month+ but < 6 Months	Record of Inspection
Preventative Maintenance	Based on OEM Recommendation	Record of PM
Repairs and Adjustments	Existence of Unsafe Conditions	Record of Repair
