

If it's Truly Rugged, it's a Glacier Solution!

Rugged Mobile Computing Solutions

Glacier Everest Series Vehicle Mount Terminals

Models: E5000, E4000 & E2000

Information is the key to success in warehousing and manufacturing. The Everest Series incorporates the features most commonly requested by warehouse, freight and shop floor customers all at an affordable price, running Windows XP/Vista/Windows 7/Windows CE.

Benefits

- Designed for forklift and fixed-mount applications where shock, vibration, extremes of temperature and airborne contaminants are the norm
- Three display sizes, numerous processor options, and wireless connectivity, the Everest can be configured to meet your specific data collection challenges
- Whether on a forklift, manufacturing floor or distribution center dock door, the Everest increases efficiency, accuracy and productivity, 365 days per year

Glacier M3 Series Handheld Computers

Models: M330, M340 & M350

The M3 Series represents a new standard for data collection in a slim, light-weight, ergonomic design. Each model offers a full line of features and accessories for your mobile workforce, both inside and outside the four walls.

Benefits

- Highly configurable design to fit your requirements
- Standard configuration includes the terminal, 2 batteries, com/charge cradle, power adaptor, USB cables, 3 stylus, earphone mic, ActiveSynch CD and user manual
- Innovative board level ruggedization for ultra light, ultra slim, durable form factor
- Anti-Microbial, Silver nano casing for medical and healthcare environments to withstand repeated sterilizations
- Standard 3 year warranty

Glacier M3 Series Handheld Computers

Models: M300 & M305

The M3 Series offers an innovative ergonomic design that is super rugged and loaded with features. Priced right, the M300 & M305 offer an exceptional value and a full line of features and accessories.

Benefits

- Fully tested to a 6 foot drop to concrete and sealed to a true IP65 rating
- Ergonomic pistol grip design for fatigue-free all day use in scanning intensive environments
- Standard 3 year warranty

Glacier Wearable Computer

Model: W200 & W250

The W200 Wearable Computer is a powerful computing device designed to be attached comfortably to the user's wrist for hands-free operation. The W250 is designed for Military, Police, Forestry Service and Emergency Response applications.

Benefits

- Ergonomic design comfortably fits user's wrist, under or over clothing
- Increase productivity with hands free data capture and full time computer access
- Tilt and dead reckoning system sets the wearable on standby power mode when operators arm is vertical
- Both Linux and Windows CE operating systems available

Glacier Portable Tablets

Models: T100 & T400

The T100 and T400 are designed for ease of operation in a multitude of settings offering a light weight design, user friendly touchscreen, and hot swap battery function. The Glacier portable tablets are the ideal tool for all-day usage, designed to run 24/7 in a variety of environments.

Benefits

- Bring data collection applications to field service, warehousing, manufacturing, customer service and more
- Enhance productivity with a high-bright display with touchscreen, integrated wireless, GPS, and flexible docking solution
- Multiple operating systems: T100-Windows CE.Net 5.0 and the T400-Windows XP Professional or XP Embedded

Glacier Portable Tablets

Models: T600 & T650

Portability and durability are of prime importance in today's rugged data collection marketplace. Workers mandate a reliable and versatile product that performs under all conditions, without fail. The T600/T650 are designed specifically to bring desktop computing to your mobile workforce in construction, utility, distribution, delivery and freight.

Benefits

- Enhance productivity with a large 10.4 inch sunlight-readable display
- Built to withstand harsh working environments-drop tested and UL rated, IP65 sealed enclosure
- Rotating and solid-state drive options-running Windows XP Pro or XP Embedded
