

Ridgeline T400

Rugged Mobile Computing Solutions

Full screen tablet offers versatility and expansion

User-friendly light weight tool for all day data collection use

Glacier Computer's T400 tablet computer is designed for ease of operation in a multitude of settings. The T400's lightweight design, user friendly touchscreen, and hot swap battery function, make the T400 the ideal tool for all-day usage.

The T400 is engineered for data collection applications in field service, warehousing, manufacturing, customer service, and more. Every tablet comes standard with a 10.4" display, efficient ATOM processor, integrated camera, and fingerprint reader. Valuable add-on modules include a 1D scanner, RFID, Mag Stripe reader, and GPS.

As with all Glacier products, the T400 is meant to run 24/7 in a variety of environments. Specifications include IP54 sealing, drop testing, and wide temperature operation. Add a sunlight readable display and the T400 is your finest all around data collection device.

- EFFICIENT ATOM PROCESSOR
- 10.4" XGA DISPLAY
- BUILT-IN WLAN / BLUETOOTH / WAN
- NUMEROUS I/O INTERFACES
