

ASG Services' reputation for providing the highest quality warehouse labels is second to none. With some of the toughest materials available and unparalleled accuracy, our company leads the way in its industry.

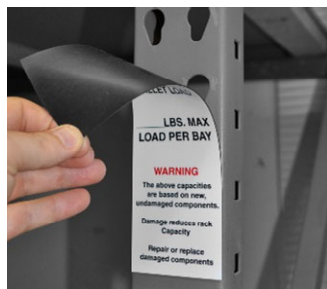

Investment in technology keeps ASG Services ahead in the supply of durable barcode labels, with advanced print processes to create high definition barcodes with outstanding scan verification rates.

All forms of data can be applied to the labels including barcodes, alpha, numeric and alphanumeric characters, making them ideal for variable location referencing and data capture.

Barcode options include linear and two dimensional variations in all code symbologies.

Polyester based labels are the most commonly used in warehouses. ASG also provide plastic composite labels which are a three part label created for strength and durability. Having several options means our labels are ideal for use as rack location labels or on floors, box ID tags, LPN labels, magnetic shelf labels, cold store labels, and much more.

Custom design, in-house production and managed installation services will make ASG Services a trusted supplier and business partner to your company.

Our warehouse labels have many features including:

- Tough and cost effective base materials,
- Lamination for added protection,
- High definition print,
- Permanent, temporary & cold store adhesives,
- Excellent barcode quality,
- Unrestricted sizes,
- Magnetic backing,
- Full installation services.

High visibility multi-color labels are available to improve recognition which increases accuracy and therefore pick rates.
