Warehouse & Manufacturing Solutions

Use As Conveyor For Assembly Line Or For Material Transfer Within The Facility

LEANLINE CONVEYOR

- Non-Invasive Install With Minimal Modifications
- Space Saving, Low Profile Design
- Moves Heavy, Hard To Handle Loads
- Flexible Speed Range
- Add Rail Lengths to Expand Conveyor

Multiple Motor Configurations Available

“DROP-IN” DESIGN FOR FAST INSTALL

FREIGHT RUNNER® PRODUCT OVERVIEW

Installation

- Customizable to Customer Requirements
- Modular & Flexible Design Capabilities
- Ability to Retrofit Existing Facility Or Trailer

Applications

- Systems Move From ¼" To 60'+ Per Minute
- Add Conveyors For Nearly Unlimited Length
- Modify Rails To Increase Capacity

Chain System

- No Complex Tensioning Systems
- High quality 60-2 Roller Chain
- Armor Coat Option for Corrosion Resistance

Maintenance & Operation

- Few Moving Parts For Minimal Maintenance
- Multiple Drive Options Available
- Simple And Intuitive Controls

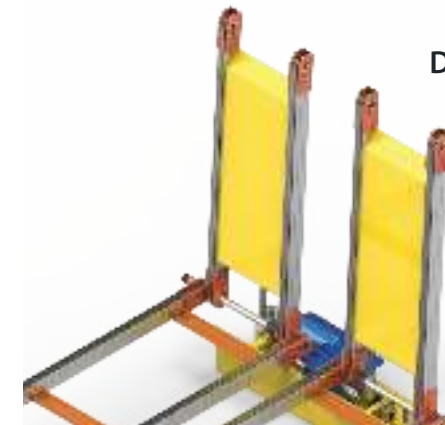

As a fourth-generation family owned company, KEITH is focused on creating customer relationships built on providing excellent products and customer service.

Dock to Trailer System

Integrate Loading/Unloading Dock Operations & Automate Cargo Handling

DOCK CONVEYOR

- Requires Minimal Facility Modifications
- For Enclosed Warehouses & Open-Air Docks
- Optimizes Available Warehouse Resources
- Reduces Trailer Load/Unload Times Up to 80%
- Improve Safety By Keeping Personnel Off Dock

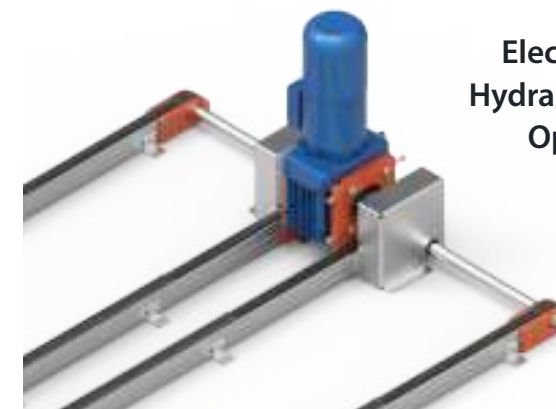

Dual 5HP Motors

SEAMLESS CARGO TRANSFER BETWEEN DOCK & TRAILER

TRAILER CONVEYOR

- Fast and Easy Trailer Installation
- Speed Up Product Distribution
- Minimize Product And Trailer Damage
- Load Trailer With A Touch Of A Button
- Increase Loads Per Trailer, Per Day

Electric and Hydraulic Motor Options

SPEEDS PRODUCT DISTRIBUTION

FREIGHT RUNNER SYSTEMS SPECIFICATIONS

Depending upon the application, load/unload times at the dock can be reduced to less than 5 minutes. Facilities also realize a reduction in labor and equipment costs because fewer resources are needed for loading/unloading. Loads can be pre-staged in the warehouse and loaded with the touch of a button by the truck driver, freeing forklift traffic for other work.
