

Hands-Free, Eyes-Free™

Voice Solutions

by Mountain Leverage

What is voice-directed technology?

Our **Hands-Free, Eyes-Free™** customized voice system literally talks your picker through a process. The worker hears and responds to interactive voice cues using a lightweight headset which connects wirelessly to a small, wearable voice device and integrates easily with any host system (WMS). Other benefits include:

- Superior speech recognition
- Battery power lasting up to 14 hours
- Noise-cancelling microphones
- Multiple languages supported
- Mobile apps for supervisors
- Easiest start-up for new hires

Why should warehouses consider Mountain Leverage voice picking solutions?

85%
reduction in
training time

99.9%
average order
accuracy

Exponential
improvements in
employee safety

25-40%
faster piece picking vs.
paper and RF scanning

20%
gain in picks-per-hour
productivity

Greater
labor attraction, retention,
and performance insights

What do people say about working with Mountain Leverage?

"Voice is a tool. What makes it truly successful is not the software - it's you guys. **I don't have this kind of relationship with any one of our suppliers.** That is what makes voice successful for us."

- Director of Fulfillment and Logistics

"**Your team is incredible.** The knowledge that Katie and Eric had of our operation from our limited discussions continues to amaze me. They always asked questions that triggered great operational discussions."

- Distribution Manager after switching from Lucas Voice to Mountain Leverage Voice

"Our experience **working with the Mountain Leverage team was great**, especially Jeff. He is attentive, knowledgeable and helped keep us focused and on task while we handled our other day to day tasks."

- Operations Support for Fleet Maintenance and Inspection

"Mountain Leverage's support group keeps things running in our distribution center. We are glad to have them as **part of our extended team.**"

- Warehouse Supervisor after switching from paper-directed picking to Mountain Leverage voice-directed picking
