

CASi-SmartBox

LOZTER + CASI

Significantly reduce shipping costs with the dynamic CASi-SmartBox

How the CASI-SmartBox WORKS

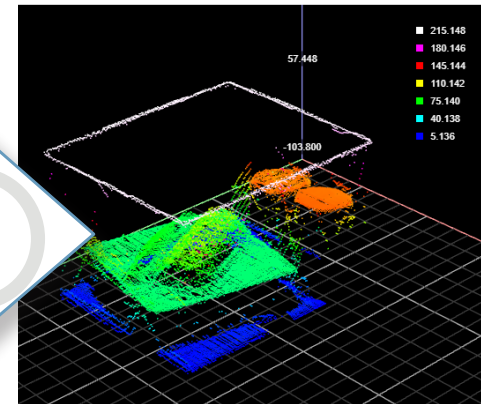

ORDERS PICKED OR PACKED INTO A BOX

1

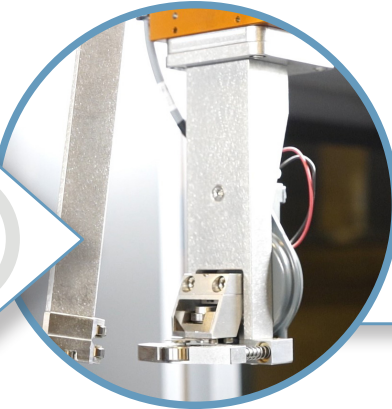

TALLEST ITEM IN THE BOX IS PRECISELY DETECTED.

2

CORRUGATE IS CUT AT THE HEIGHT OF THE TALLEST ITEM IN THE BOX.

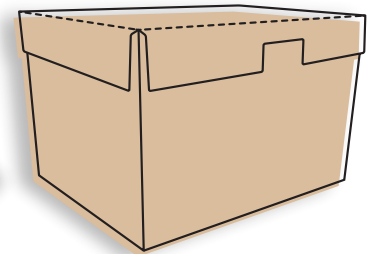

3

THE RESIZED BOX IS EITHER MANUALLY OR AUTOMATICALLY LIDDED.

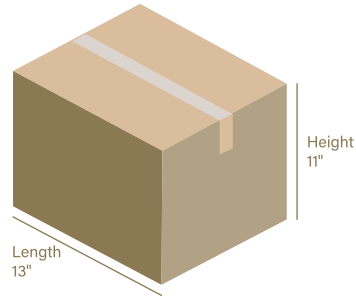

4

RIGHT-SIZED

AUTOMATIC LIDDING ALSO AVAILABLE.

DIM SAVINGS YEAR-TO-DATE

\$228,408

The CASi-SmartBox is a box resizing system to help small to mid-size E-Commerce, 3PL, and retail distribution centers save thousands annually on outbound shipping expenses.

By removing the excess corrugate from the box, a customer can incrementally save on dimensional weight shipping costs.

KEY FEATURES

- Dynamically adjusts to variable box footprints
- Sustainability tracker
- Real-time shipping savings calculator

CASi-Conveyor *RIGID-CURVE*

A curved section of conveyor for tight spaces, with features including:

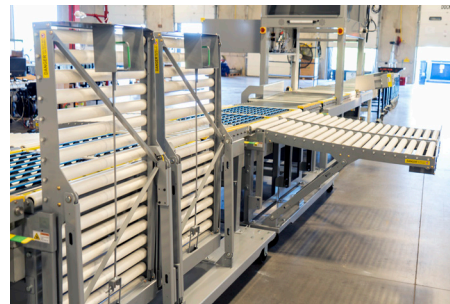

- Tapered rollers and a high guard rail to keep packages in tow
- Bi-directional with identical connectors at each end
- Ability to regulate speed to adjust the spacing and timing between packages

CASi-SORT

A complete automated receiving solution including scanning, manifesting and sortation, with features including:

- Scanning, manifesting and sortation
- High efficiency automation that significantly reduces time and labor in the receiving process

CASi-IBOD

Fully automated in-line box cutting device, with features including:

- Minimizes injuries and product damage associated with manual cutting
- Reduces time and labor
- Multiple box cut options and lid removal

CASi-SCAN

Scanner with the ability to scan up to 6 sides of a package, with features including:

- Verification for receiving or outbound operations
- Reconciliation vs. a digital trailer file
- Optional camera for visual verification
