

# OPEX<sup>®</sup>

## WAREHOUSE AUTOMATION SYSTEMS

Designed with your specific needs in mind, OPEX<sup>®</sup> automation is your partner in transforming your supply chain infrastructure for success.

### AUTOMATED STORAGE AND RETRIEVAL SYSTEMS

OPEX provides adaptable and expandable solutions for automating warehouses. These solutions utilize high-density racks and self-driving robotic vehicles to efficiently access inventory. By optimizing vertical space, they enhance productivity and are well-suited for a range of applications, such as omnichannel distribution, store restocking, micro-fulfillment, and e-commerce.

#### OPEX<sup>®</sup> INFINITY<sup>®</sup>

Designed to optimize the capacity and flow of inventory, the Infinity<sup>®</sup> AS/RS system offers 35% more storage than other goods-to-person systems. With its exceptional precision, Infinity expedites order fulfillment while making the most of your available space. By implementing Infinity, you are not only enhancing operational efficiency but also adopting a dependable warehousing solution that is prepared for the future.

#### OPEX<sup>®</sup> PERFECT PICK<sup>®</sup>

The Perfect Pick<sup>®</sup> robotic goods-to-person picking technology is engineered to simplify order fulfillment automation with increased throughput, reliability and cost-effectiveness.

Perfect Pick HD goods-to-person system stands for “high-density” offering twice the storage of a single Perfect Pick aisle without sacrificing throughput for storage capacity. Rather, with this increased aisle density, customers have greater flexibility to slot items across their warehouse, eliminating zones and streamlining their process.

# AUTOMATED SORTING SYSTEMS

OPEX offers a range of automated sorting solutions that are designed to optimize the sorting process and enhance productivity without the need for additional labor. Our systems are highly scalable and configurable, making them the perfect fit for micro-fulfillment centers, retail stores, and distribution centers of all sizes. Our solutions are designed to help businesses streamline their sorting processes and improve efficiency, ultimately leading to cost savings and increased profitability.

OPEX Sure Sort® is the industry's most versatile, scalable, configurable, and cost-effective automated sorting solution available anywhere. Sure Sort is engineered to help businesses of all sizes improve the overall efficiency of their distribution operations, save time and money, and meet the demands of a changing world.

Sure Sort X provides a reliable and robust industrial solution to handle nearly 100% of customer-sortable products, including items 60% smaller, nearly 20% larger, and up to 4X heavier than Sure Sort.

OPEX Xtract™ is an optional feature for Sure Sort X that automates the order takeaway process. By automating two crucial aspects of order fulfillment, namely the rapid sorting of batch- or wave-picked inventory and the previously manual order takeaway process, it offers a comprehensive and turnkey solution.
