Deposco
Bright Suite™

Deposco's Bright Suite is a cloud-based, order management and fulfillment software application set that optimizes supply chain operations.

Bright Suite

OMNICHANNEL FULFILLMENT SOLUTIONS

Deposco's Bright Suite of applications offer e-commerce, retail and omnichannel capabilities, that drive revenue growth, improve service levels and reduce operational costs. We empower retailers, distributors, 3PLs and brand companies by helping them optimally allocate, source and fulfill orders across multiple channels.

Embedded in our Bright Suite are advanced e-commerce, retail and omnichannel specific capabilities, which allow retailers to synchronize and streamline data flows between e-commerce, marketplace, accounting and marketing systems.

Deposco
Bright Warehouse™

Deposco's Bright Warehouse streamlines warehouse operations by optimizing shipping and receiving, order management, picking and putaway, and inventory management.

Bright Warehouse

WAREHOUSE, INVENTORY & SHIPPING MANAGEMENT

Warehouse operators are continuously challenged with increasing throughput and employee efficiency to fulfill and ship more merchandise without increasing cost. A strong warehouse management software, like Deposco's Bright Warehouse application provides Enterprise-grade benefits and advantages, regardless of your existing size and infrastructure. The flexible structure of our Bright Warehouse ensures that your business logic and processes can be boosted to sync up and integrate into your overall demands within and enterprise resource planning (ERP) infrastructure.

With complete end-to-end control, monitoring and company-wide inventory visibility, your company will be prepared for on demand sourcing and fulfillment strategies that meet the extremes brought on by peak seasons, promotion and new product launches. Deposco's Bright Warehouse application ensures that you take advantage of all of your building, hardware, inventory and human assets to cost effectively meet the intense market demands of the new express fulfillment model for improving order to cash.

BENEFITS INCLUDE

- Company-wide Inventory Management with inbound and outbound visibility and automated tracking

- Robust supplier and third party management ideal for retailers, Distributors, and 3PLs alike

- Integrated with Deposco's Bright Suite for omnichannel or store-based fulfillment and returns

- Reverse Logistics receiving and re-ship logic with real-time visibility, Warehouse or Store putaway

- Order Management, Picking, Packaging and Packing with Purchase Order, Invoice, and branded forms

- Multimodal shipping management with UPS, UPS Freight and other carriers

Deposco
Bright Store™

Deposco's Bright Store allows you to extend omnichannel fulfillment capabilities and inventory visibility to your physical retail stores.

Bright Store

RETAIL POS & OMNICHANNEL FULFILLMENT

Businesses are continuously searching for new and better ways to deliver merchandise faster and cheaper. Today, many are turning their retail locations into local distribution centers and are now fulfilling e-commerce orders from their stores. Deposco's Bright Store application provides company-wide inventory visibility across all channels and an integrated Point-of-Sale (POS) System that helps you execute an omnichannel fulfillment strategy.

BENEFITS

- Company-wide inventory visibility and tracking

- Integrated with warehouse management and order fulfillment applications

- Automated order replenishment

- Access data from any web browser

- Faster checkout and reduced pricing errors

- Intuitive interface that enables quick processing

- Low initial investment costs

- Permissions and alerts based on individual business role

Deposco
Bright Source™

Deposco's Bright Source improves vendor management and sourcing with real-time connections to accurate business data.

Bright Source

VENDOR MANAGEMENT, SOURCING AND INVENTORY PLANNING

Retailers and distributors are increasingly challenged to make optimal purchasing and sourcing decisions. Managing inventory means knowing what products to replenish at the right time in order to satisfy customer demand, and who to purchase from in your vendor network. As sourcing globally becomes more complex, managing suppliers throughout the sourcing and fulfillment process is essential for profits and growth.

Deposco's Bright Source application provides inventory planning, robust vendor management and sourcing software with Enterprise-grade benefits and advantages. With complex order routing, purchase order creation, shipping requirements and vendor-based business rules, Bright Source allows businesses and trading partners to automate purchasing with real-time information for improved forecasting and decision making.

The flexible structure of Bright Source safeguards your company from costly stock-outs that can threaten customer loyalty. Bright Source connects your business and your suppliers through direct integration, EDI, email, notifications, or integration through your ERP or Deposco's Bright Suite for complete automation of distributed order management and fulfillment across suppliers and channels.

BENEFITS INCLUDE

- Manage vendors and suppliers, extend inventory visibility and track SKU data to shop across your supplier networks

- Generate purchase orders and replenishment orders with suppliers, warehouse and stores leveraging important real-time data

- Automate purchasing decisions based on SKU performance, reorder points, safety stock thresholds, lead time and supplier-based business rules

- Manage drop-shipping and cross-dock fulfillment strategies to offer more products faster
