Deposco, Inc.
4800 North Point Parkway, Suite 100 | Alpharetta, GA 30022
info@deposco.com | www.deposco.com

Deposco's Bright Suite is a cloud-based, order management and fulfillment software application set that optimizes supply chain operations.

EXECUTIVE SUMMARY

Deposco Bright Suite

FOUNDED IN 2005

Headquarters in Alpharetta, GA
Primary goal is to help retailers optimize their supply chain operations.

UPS STRATEGIC ENTERPRISE PARTNER

UPS invested in Deposco in 2006 in support of our mission and as a means to enhance their evolving business model.

COMPANY FOCUS

Providing comprehensive e-Commerce and Omni-Channel Fulfillment solutions to the Internet Retailer 1000

ORANGE CULTURE

Orange is a not only a company color but also a credo:
Open, Respectful, Accountable, Nimble, Giving, Excellent

DEPOSCO FITS
Deposco Bright Suite

Deposco's omnichannel fulfillment software applications connect various systems within your organization, creating seamless dataflows to and from Deposco and other trusted, third-party ERP, WMS, POS, CRM, SCM and DOM systems.

BRIGHT WAREHOUSE

WMS & Inventory Management

RECEIVING

Manage receipt of goods against PO or ASN, barcoding, labeling, disposition of goods, Quality Control & Compliance, cross docking, and returns.

PUTAWAY

Dictate system directed putaway, user directed putaway, stock replenishments, and cross dock putaway.

INVENTORY MANAGEMENT

Manage all inventory processes inside your warehouse, including cycle and physical counting, tracking, consume & add, location replenishment, quality control, and VAS.

PICKING & FULFILLMENT

Optimize picking strategies – batch, bulk, case/pallet, waveless picking – and stage orders for packing stations and retail labeling and palletization.

WAREHOUSE MANAGEMENT

Allocate orders in DCs, generate backorders, workgroup assignments, pick tasks, and RTVs.

SHIPPING

Directly integrate to parcel and local carriers and LTLs, calculate dimensional weight, rate shop, generate shipping labels and documentation, and track.

Sourcing & Fulfillment

IN-NETWORK ORDER SOURCING
Determine the optimal fulfillment location – DC, store, or drop ship partner- for each order based on available inventory, end customer location, and delivery times.

INVENTORY ALLOCATION
Reserve inventory for a customer order from any network location by removing items from on hand stock and allocating them to the specific sales order.

AUTOMATED ORDER ENTRY
Capture orders from all your sales channels and automatically create a corresponding sales order directly into QuickBooks or your ERP system.

INVENTORY MANAGEMENT
Monitor and manage inventory levels at all locations and segment stock by channel or business unit.

Fulfillment Strategies

REPLENISHMENT ORDERS

Generate automatic replenishment orders from suppliers to your warehouse as well as facilitate replenishment orders from your warehouse to your stores.

FORECASTING & PLANNING

Automate future purchasing decisions based on SKU performance, reorder points, safety stock thresholds, lead times, and supplier-based business rules.

DROP SHIP MANAGEMENT

Route orders to drop ship partners for fulfillment, while managing vendor Purchase Order creation, shipping, alerts, and more.

CROSS-DOCK MANAGEMENT

Identify cross-dock opportunities for faster, more cost-effective order fulfillment.

VENDOR MANAGEMENT

With extended inventory visibility to include your vendors, you can track vendor SKUs and price shop across multiple vendors.
