

Document Printer/Inserter

ISD **ULTRASERT™**

- **ULTRASERT™** utilizes a standard, heavy duty laser printer coupled with our simple and reliable inserting mechanism
- Documents can either be single or multi-page.
- The inserter counts the correct number of pages in the document group and inserts the page stack into a waiting carton

**Competitively Priced and
Virtually Maintenance Free**

ISD **ULTRASERT™**

Rates up to 25 inserted documents per minute

Depending on page count and system configuration, the printer/inserter can attain rates up to 25 document sets per minute.

Insert documents into mixed carton sizes

The equipment can insert documents into mixed carton sizes without any change-over or adjustments. It can even reliably insert documents which are the same size as the carton opening. (i.e. 8 1/2" x 11" document into an 8 1/2" x 11" opening)

Designed to be virtually maintenance-free

The inserter mechanism has only four main moving parts and is designed to be virtually maintenance-free. Communication with the host system is typically via an Ethernet connection and the unit can interface with most software capable of sending text and bar code output to a standard laser printer.
