

# Order Picking Optimization

Products to increase your productivity 20%-50%!

**UltraPick™ & UltraBatch™** work together to dramatically increase your systems throughput and accuracy.

## ISD **ULTRAPICK™**

**UltraPick™** is a user-friendly software product that features a graphical interface designed specifically for applications with split case and carousel systems.

UltraPick details information on picks, put-away and cycle counts including; SKU information and SKU photographs (if desired) combined with 3D renderings of the operator's workstation.

### BENEFITS:

- Effective carousel spin logic that supports both dynamic and static batching
- Ability to use SKU attributes such as lot control and serial number tracking
- Directs put-away based on definable rule sets
- Can drive new and/or existing pick lights
- Can be integrated with existing hardware and WMS, WCS or ERP systems

## ISD **ULTRABATCH™**

**UltraBatch™** is ideal for fully automatic induction and discharge of orders

Dynamic or continuous batching means no beginning or end of a batch; operators remain focused on picking 100% of the time.

- The system can induct cartons or totes of different sizes and weights and/or mixed types of containers within conveyor limitations.
- Scanning, lifting, and shuffling cartons or totes at the workstation can be completely eliminated.
- Can be implemented into new or current carousel systems

**“Solution Providers – Start to Finish”**

**ULTRAPICK™**

**ULTRABATCH™**

## What can these products do for you?

- **Significantly increase** system throughput over normal batch style picking
- **Improve** operator pick and put away accuracy
- **Minimize** operator interaction with scanners or computers
- **Streamline** support operations such as put-away and cycle counting
- **Increase ROI**
- **Extend** order cut-off times for customers
- **Improve** overall customer satisfaction

## Who Benefits from ISD “Ultra” Products?

- Current carousel operations that want to maximize productivity
- Order Picking Operations wanting to increase productivity, accuracy and most importantly; improve customer satisfaction
- Customers that want the maximum performance and return on investment on day one

## How do they work together?

**UltraBatch™** and **UltraPick™** work together to dramatically increase system throughput and accuracy. This is accomplished by enabling the operator to constantly pick, replenish or cycle count. ISD's Ultra products fully automate your system's workstation. Both **UltraBatch™** and **UltraPick™** can be integrated into current carousel applications or can be installed as part of a new system.
