

ACTview

Intelligent Fleet Analytics and Reporting

Performance Enhancements

- Patented automated software and firmware updates
- Over-the-air updates for seamless integration of new features on functionalities

Efficient Data Control and Empowerment

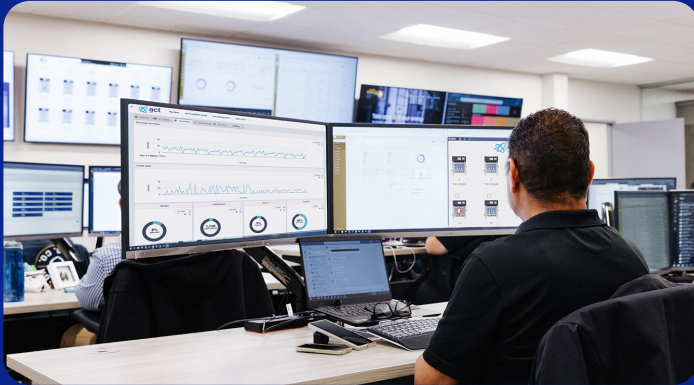

- Effective collaboration through multi-user data management and role-based access control (RBAC)
- Access and centrally manage a comprehensive portfolio of battery and charger assets, ensuring efficient data control

Fleet Management

- Real-time analytics and reports for Quantum and Battview assets
- Secure data through user authentication, hosting, data storage, and backup with ACT's Network Operations Center (NOC)

Integrated Solution for Smart Battery Charging and Monitoring

ACTIntelligent Fleet Optimization Remote Monitoring

Get 24/7 access to your fleet's status with automated real-time data uploads. ACT's technical professionals will proactively monitor your fleet, troubleshoot issues, and optimize battery and charger management for peak performance and reliability.

ACTEnergy Dynamic Demand Response System

Elevate your facility's efficiency with ACTEnergy's integrated dynamic programs, like automated peak shaving and demand response. Our intelligent algorithms, driven by battery performance data, optimize energy use and minimize disruptions.

Quantum Efficient Fleet Charging for Smart Operations

Remotely analyze fleet performance through advanced data analytics. Manage & send commands remotely to start, stop or optimize charge cycles. Industry's highest charge efficiency (> 94% peak).

Battview Smart Industrial Battery Monitoring

Remotely analyze fleet performance through advanced data analytics, battery utilization and battery performance data.
