Ensure on-time delivery, whether overnight or many days out

Leverage special carrier conditions prior to last minute rush
The science behind shipping smarter.

Whether it is the holiday season with a more frenetic pace for eCommerce shopping, or you just want to have a more methodical way of tracking your carrier rates, shipping software can help you decide the best shipping options. ProShip's Advanced Date Shopping* module helps you make smarter shipping decisions through science.

With ProShip's Advanced Date Shopping, we calculate the best service for delivery that meets or exceeds your customers' expected date to help ensure customer satisfaction and cost-efficiencies for you.

BOLT WHEN SUFFICIENT SHIPPING OPTIONS AREN'T OFFERED

Let ProShip do the heavy lifting.

- Account for carrier holidays, weekends and other non-transit days (per service level).
- Account for last trailer pulls when all carriers have not been picked up for a given ship date.
- Know when the package is picked up and placed in the carrier trailer.

What's Advanced Date Shopping

Advanced Date Shopping extends beyond just shipping cost to fine tune which carrier service you should use.

ProShip considers detailed factors such as your customers' selected delivery requirements, if the label is created in time to make the trailer cut-off for that day, when the trailer is

scheduled to leave, and all of your unique carrier contracts including pick-up, transit and delivery dates.

When selecting the applicable carrier service, ProShip also takes into consideration key package and destination attributes. These include: the

package's weight, dimensions and whether it contains dangerous goods materials, commercial versus residential delivery addresses, or if there is an extended delivery area. ProShip then presents normalized shipping costs regardless of carrier mode (land, air, sea) so they can be

easily compared to make the most cost effective and efficient shipping decision.

Upon selection, ProShip delivers the appropriate carrier labels and documentation required for each shipment in split seconds.

Without burdening IT, shipping managers input their carriers' holiday schedules, special conditions, expanded timeframes, rates and other information into ProShip software.
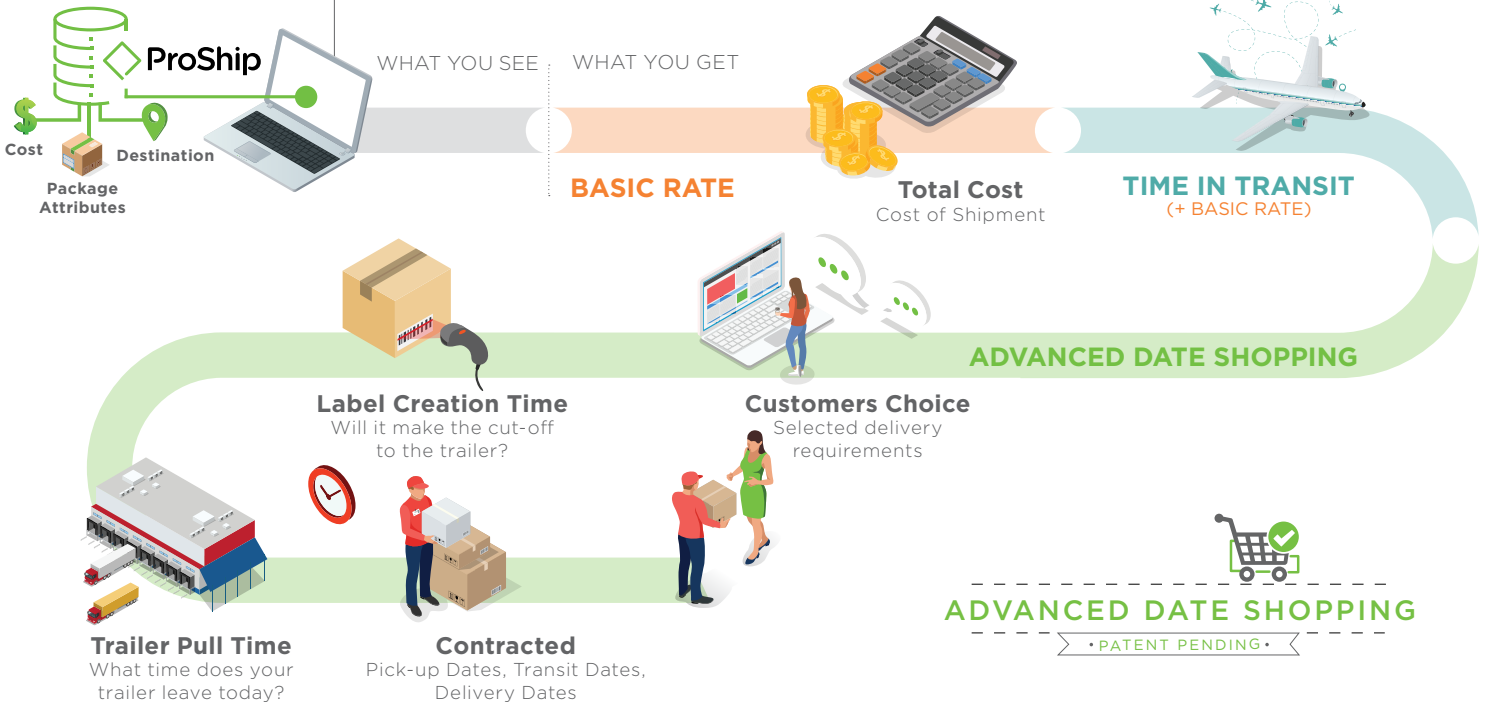

Advanced Date Shopping
It's accurate, streamlined, organized and easy.

Benefits

> Business rules, carrier conditions and special offers are implemented in real-time—without disrupting productivity.

> Carriers offer more shipping flexibility enabling retailers to serve customers more flexibly.

> Consumers get what they want on time and can avoid expensive next-day or overnight shipping services.

The ProShip Web Configuration Portal provides easy administration for logistics leaders to maintain ADS rules for pickup, transit, or delivery options without waiting for time-strapped IT resources.
