

Datex Footprint® 3PL WMS, a Warehouse Management System for Market Visionaries

It's a tremendous time to be a 3PL provider. In a stretch of years where many industries have faced slowdowns, 3PLs have enjoyed steady growth. Online retail is surging, and if you're a 3PL with the right capabilities and ample capacity, the future is yours.

But with growth comes complexity. Each new customer arrives with a full bag of customized wants, needs, and fulfillment preferences. Each new shopping season brings new labor challenges, compounded by a persistent labor shortage. And as distribution becomes the cornerstone of the brand experience, 3PL providers are asked to shoulder bigger challenges and measured to higher standards.

The key to success is technology. A strategic investment in the right logistics technology is how the smartest warehouses are run, the toughest operational challenges are solved, the most profitable businesses are built, and the best brand experiences are delivered.

At the heart of our offering is our newest generation of Datex® Footprint WMS, a premier SaaS application hosted on Microsoft Azure, fully integrated, composed, published, and managed within our Wavelength platform. With its intuitive drag-and-drop simplicity and zero downtime update capabilities, Datex Footprint WMS empowers clients to swiftly deploy customized enterprise solutions to meet complex operational needs.

Datex Footprint® WMS:

Transforms the user experience:

Experience a role-driven user interface that is perfectly tailored to every customer requirement, and easily updated every time a requirement changes. You can boost productivity and throughput at every step, while minimizing errors and wasted time.

Seamlessly integrates with 3rd-party solutions:

Leverage low code options for custom integrations and access our extensive library of pre-built and native integrations.

Provides total visibility and proactively solve problems:

Our platform brings critical real-time information front and center and leverages predictive analytics, so you gain the power to preemptively solve problems and deliver topnotch customer service.

Provides powerful WMS functionality that can be tailored to your needs with ease and speed.

Powers up efficiency and decision making with built-in workflow capabilities, reporting and dashboards.

Increase Customer Service & Satisfaction

Datex Footprint® 3PL WMS allows companies to track any type of inventory including electronic equipment, apparel, pharmaceuticals, food and beverage, etc. with complete tracking of serial numbers, lot number, and expiration. Datex Footprint® 3PL WMS comes equipped with several stock rotation systems such as FIFO, FMFO, or FEFO, among others.

Datex Footprint® 3PL WMS gives you the flexibility to offer your customers multiple billing options to fit their specific needs. Each owner's inventory is completely separate from other inventory owners within the warehouse giving your customers the feeling of having their own warehousing facility.

Best 3PL Billing on the Market
