

Datex Footprint® Pharma WMS, a Warehouse Management System for Market Visionaries

Datex brings decades of expertise under your roof and pairs it with new, innovative technology to propel your business forward. Datex Footprint WMS is a SaaS warehouse management system designed for visionary companies with complex requirements and ambitious growth plans, who see technology as a strategic differentiator to achieving exponential revenue growth and unparalleled efficiency.

Datex Footprint WMS was developed on our proprietary Wavelength platform – where we’ve encoded decades of expertise, collaborating with operations, executive leaders, technology teams, and frontlines employees across multiple markets and customers. The combined result is an unparalleled set of core WMS features, along with a native integration to critical business and supply chain solutions. For those who want to significantly tailor our WMS in-house and develop their own WMS and logistics capabilities, Wavelength gives you the low code building blocks to chart your own course.

Datex Footprint® WMS:

Transforms the user experience:

Experience a role-driven user interface that is perfectly tailored to every customer requirement, and easily updated every time a requirement changes. You can boost productivity and throughput at every step, while minimizing errors and wasted time.

Seamlessly integrates with 3rd-party solutions:

Leverage low code options for custom integrations and access our extensive library of pre-built and native integrations.

Provides total visibility and proactively solve problems:

Our platform brings critical real-time information front and center and leverages predictive analytics, so you gain the power to preemptively solve problems and deliver topnotch customer service.

Provides powerful WMS functionality that can be tailored to your needs with ease and speed.

Powers up efficiency and decision making with built-in workflow capabilities, reporting and dashboards.

Datex Footprint Pharma WMS Includes a Feature-Rich Suite of Functionality for Pharma and Healthcare Warehouse Operations

Facilitates FDA 21 CFR Part 11 Compliance:
