Deep-freeze storage

Stöcklin offers you the right intra-company logistics solutions for storage at controlled temperatures. All components in this wide product portfolio are also available for ambient temperatures down to -30°C .

The change in consumption habits in the foods sector has led to massively increased demand for automated deep-freeze storage within the past few years. Stöcklin recognized this trend at an early stage and developed solutions for storing goods in areas with controlled temperature to meet the high requirements of the foodstuffs and pharmaceutical industries.

All standard elements from Stöcklin can be adapted for use in refrigerated storage with temperatures down to -30°C . Naturally, it was not sufficient to only adapt the electrical components, cables, various oils and greases to low ambient temperatures. It was also necessary to use materials suitable for deep-freeze zones in our steel construction.

We guarantee to you the continuous control of the deep-freeze chain from initial storage to picking and shipment. With our experience in intralogistics and wide range of know-how in product development, we guarantee smooth customer service from planning to after-sales maintenance.

Deep-freeze storage systems by Stöcklin:

	Galliker Transport AG, Switzerland	KLM Rheine Logistik, Germany	La Provençale, Luxemburg	Jan Linders, Netherlands
Temperature	-28°C	-28°C	-22°C	-28°C
Number of aisles	4 aisles of 65m	8 aisles	3 aisles of 46m	3 aisles
Storage spaces	9200 storage spaces, double-depth	90000 storage spaces	· 9000 storage spaces, double-depth · 18000 storage spaces, quadruple-depth	1500 storage spaces
Loading units	Euro 1 pallets	Chep, Euro 1 and Euro 2 pallets	Full trays and half trays	Euro 1 pallets and roll containers
Loading weight	max. 1000kg	max. 1200kg	· Half trays, max. 15kg · Full trays, max. 30kg	max. 1200kg
Device type	MASTer 24/TK	MASTer 42	BOXer (D2)	SIGOPICK-1023
