At Modex 2016, Brother Gearmotors to Launch Conveyor Series Product Line

New Gearmotors Offer Premium Efficiency for Conveyor Companies

Bridgewater, NJ – **Brother Gearmotors**, a division of Brother International Corporation that offers a wide range of ultra-reliable, sub-fractional AC gearmotors and reducers for the food & beverage, packaging and material handling industries, will introduce its **Conveyor Series** line of gearmotors at **MODEX 2016 Atlanta, GA, April 4-7**.

The new Conveyor Series line of gearmotors offers premium efficiency for long-term energy savings, as well as universal mounting for maximum flexibility. And since they are double-sealed with an O-ring for their entire lifespans, Brother's Conveyor Series of gearmotors are virtually maintenance free - significantly reducing costly downtime.

Brother Gearmotors is one of the world's largest fine-pitch gear manufacturers and meets industry demand for smaller, lighter, reliable and energy-efficient power transmission components. Key attributes of Brother's Conveyor Series gearmotors include:

- Light, reliable and compact in size
- High torque at low speed
- Sealed for life for maximum efficiency and reduced labor
- Standard high-grade grease for lifetime lubrication and reduced maintenance/downtime

- High-quality, durable, e-coat paint to withstand the toughest environments
- More efficient than worm gearboxes as a result of hardened hypoid gearing

MODEX brings together manufacturers, consultants, third party logistics providers, publishers and systems integrators to demonstrate their equipment, systems and services to tens of thousands of manufacturing and supply chain professionals from around the globe.

“Brother Gearmotors is proud to introduce our Conveyor Series of gearmotors to the material handling industry at MODEX 2016,” said Matthew Roberson, Senior Director of Brother Gearmotors. “The advantages offered by the Conveyor Series product line demonstrate our commitment to providing customers with gearmotors that are highly efficient and cost-effective, in addition to being durable and reliable.”
