YOUR PARTNER IN SAFETY

Clarion Safety is at the forefront of product and workplace safety communication, leading the best practice ANSI and ISO standards in these areas for over three decades. We design and produce product safety labels and facility safety signage – along with offering complementary solutions and services like safety and risk assessments – to identify hazards and mitigate risks.

We strive to make safety products and services accessible and approachable for all types of businesses. Whether you're in need of customized warnings, risk assessment services, or machine guard designs and installs, you can count on the Clarion Safety team, and our affiliated businesses Machine Safety Specialists (MSS) and Arrow Industrial Solutions (Arrow), to meet and exceed your expectations.

THE CLARION SAFETY ADVANTAGE

1

Expertise:

Our best practice products have proven effectiveness. With 15,000+ clients and nearly 100 million labels and signs in use, zero Clarion Safety customers have had "failure to warn" or "inadequate warnings" allegations brought against them.

2

Guidance:

We focus on a hands-on approach to guide customers to safety label and sign choices in line with their needs AND the latest standards. 100% of our customer service team is "Clarion Essentials" certified, a proprietary, standards-based education curriculum.

3

Service:

We've perfected a design and ordering process that's fast, easy and precise, so that we deliver when you want AND we get it right: 99.5% of our orders are delivered on-time, and they're received with 99.1% satisfaction.

4

Partnership:

We specialize in helping customers get up-to-date – and stay there. We're committed to being your partner in safety by offering free safety label and sign assessments.

INDUSTRY LEADING MACHINE SAFETY SERVICES ⌄

Make safety a priority with effective solutions to identify and manage hazards associated with your machinery and workplace. Our team of experts and TÜV-certified safety engineers are ready to help with safety and strategy issues that face both machine builders and users alike.
