## LIFTER REFURBISHMENT SERVICES

### **Crane 1 Services will monitor your lifter's condition with our inspections**

Regular inspections and proactive maintenance are essential for below-the-hook lifting equipment to operate at maximum safety and productivity. The BTH group has experienced and knowledgeable technicians to support all your crane and hoist related service needs. Periodic on-site inspections are an excellent way to identify lifter problems before they become a safety issue or cause costly unplanned downtime. The BTH group can provide the expertise of an unbiased, dedicated below-the-hook specialist to perform routine or supplemental field inspections.

### **Crane 1's Below-The-Hook Mill Equipment Repairs & Lifter Refurbishments**

At our BTH facilities, we provide complete lifter evaluation services with inspection, complete teardown, thorough cleaning, and detailed report. Worn and damaged components will be replaced to return the unit to productive use.

### **Crane 1's Below-The-Hook Certification and Peace of Mind**

Industry and governmental safety requirements dictate the traceability and complete documentation of all below-the-hook equipment. We provide you peace of mind with fully traceable and documented parts with thorough record keeping. We provide engineering and load rating services to provide your existing lifting equipment with labeling per the requirements of ANSI B30.20.
